BME Clearing, S.A. - Sociedad Unipersonal

Notes to the financial statements for the year ended
31 December 2018

1. Company Background

BME Clearing, S.A. - Sociedad Unipersonal (hereinafter the "Company" or "BME Clearing") was incorporated on 7 December 1988 as OM Ibérica, S.A.

In March 1991, the Company changed its name to Mercado de Opciones Financieras Español, S.A. (MOFEX). On 18 December 1991, the Company changed its name again, to MEFF Sociedad Rectora de Productos Financieros Derivados de Renta Variable, S.A. - Sociedad Unipersonal ("MEFF Renta Variable").

Also on 18 December 1991, Mercado de Futuros Financieros, S.A., (MEFFSA) changed its name to MEFF Sociedad Rectora de Productos Financieros Derivados de Renta Fija, S.A. - Sociedad Unipersonal, ("MEFF Renta Fija").

The changes in corporate name came under the framework of an agreement between the two companies to become management companies of the official markets for derivative financial products, which occurred pursuant to Royal Decree 1814/1991, of 20 December, regulating official secondary markets for futures and options.

Its corporate purpose at that time was to govern and manage the market for futures and options and other equity derivatives, assuming responsibility for the internal organisation and transactions of this market, for which it possessed the resources required. This single corporate purpose was understood to include all the activities required to fulfil the corporate purpose in compliance with the law, especially in respect of regulations governing the markets at any particular time. The Company's principal activity was the management of the Equity Derivatives Market and the clearing and settlement house from transactions in this market.

In 2010, as a result of the publication of Royal Decree 1282/2010, of 16 October, regulating official secondary markets for futures, options and other derivative financial instruments, the Company amended its Articles of Association, inter alia, to include the change in its name to MEFF Sociedad Rectora de Productos Derivados, S.A. – Sociedad Unipersonal and to include in its corporate purpose the performance of activities set forth in Article 59 of the Securities Market Act, as well as those provided by Article 44 ter therein relating to the central counterparty activities stipulated in this Royal Decree. Therefore, its corporate purpose was understood to include all activities permitting this purpose to be fulfilled and which are within the law, in particular those rules governing the markets at any given time. As a result, the regulations of the official secondary market in futures and options were changed, taking effect on 24 January 2011.

On 22 October 2012, an amendment to the Company's Articles of Association was authorised to include its new activities as a fixed income securities central counterparty clearing house, transferred from the defunct MEFF Sociedad Rectora de Productos Financieros Derivados de Renta Fija, S.A. - Sociedad Unipersonal to the Company as a result of the takeover by the Company during that year.

In 2013, the Company was involved in a corporate transaction under the scope of the reorganisation of the business carried out by the Company and by MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal (previously BME Gestión de Estudios y Proyectos, S.A.U.) to adapt the corporate structure to European regulations regarding European market infrastructures, specifically Regulation (EU) No. 648/2012 of the European Parliament and of the Council of 4 July 2012, on OTC derivatives, central counterparties and trade repositories (known as the "EMIR Regulations"), which required trading activities to be separated from clearing activities.

The proposed restructuring was authorised expressly by the Ministry of Economy and Competitiveness, pursuant to a report issued by the National Securities Market Commission, through Order ECC/1556/2013, of 19 July, authorising MEFF Sociedad Rectora de Productos Derivados, S.A.U. (now BME Clearing S.A. - Sociedad Unipersonal) to separate its trading, counterparty, clearing and settlement functions and to act as a Central Counterparty, as provided for in Article 44.ter.3 of the Securities Market Act of 24/1998 of 28 July.

On 27 June 2013, the Boards of Directors of the Company and MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal, respectively, agreed the partial spin-off of the Company to MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal entailing the transfer of the business unit, comprising the assets, technical and human resources necessary to manage the regulated market for derivative products of the Company to MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal, which acquired all the assets and liabilities, rights and obligations of the business unit through universal succession.

On 26 July 2013, Bolsas y Mercados Españoles Sociedad Holding de Mercados y Sistemas Financieros, S.A., as the Sole Shareholder of both companies, approved the partial spin-off to MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal, amended its corporate purpose to include interposition on a principal basis with regard to the clearing and settlement of securities or financial instruments as set forth in Article 44 ter of the Securities Market Act and the implementing provisions thereof applicable at any given time, and changed its name to the current BME Clearing, S.A. - Sociedad Unipersonal.

The Company was authorised by the Ministry of Economy and Competitiveness, through Ministerial Order ECC/1556/2013, of 19 July, which was published in the Official State Gazette (Boletín Oficial del Estado) on 14 August 2013, to operate as a central counterparty clearing house, as provided for in Article 44.ter.3 of the Securities Market Act of 24/1998 of 28 July.

In addition, on 16 September 2014, BME Clearing received authorisation to operate as a Central Counterparty (CCP), in compliance with the aforementioned EU Regulation No. 648/2012 of the European Parliament and Council, and was included in the register of authorised European Union CCPs, kept by the European Securities and Markets Authority (ESMA).

Furthermore, on 29 July 2015, the Company received authorisation from the Spanish National Securities Market Commission to broaden its clearing activities once the joint review process carried out by the Association of Regulators set forth in the EMIR Regulation has concluded. The new clearing activities refer to the two new segments: OTC interest rate derivatives and purchase/sale transactions for equity instruments. This is a key element in the reform of the securities clearing and settlement system. Activity in the OTC interest rate derivatives segment began on 30 November 2015 and activity in the equity securities segment, which includes clearing of equity spot trades from the electronic trading platform, began on 27 April 2016.

The entry into force of the Reform of the Spanish equity securities clearing, settlement and registration system (instigated by Act 32/2011, of 4 October, which modified the Securities Market Act 24/1988, of 28 July; and culminating in the first final provision of 11/2015, of 18 June, with the aim of standardising Spanish post-trading activities in line with those of other European countries), involved three main changes: a) a move to a holdings-based registration system for equity securities; b) the introduction of a central counterparty (CCP) and c) bringing together the current settlement systems, CADE and SCLV, into a single platform.

Following the entry into force of the reform, on 27 April 2016, the Company's activities include clearing of equity spot trades from the electronic trading platform (trades on securities admitted to trading on the Spanish Stock Exchanges and on the MAB and Latibex multilateral trading systems).

On 18 September 2017, the second phase of the Reform of the Spanish securities clearing, settlement and registration system ended, with (a) inclusion in the ARCO Settlement System of those fixed income securities which until now were part of the Clearing and Settlement System for transactions in the book-entry public debt market and the AIAF fixed income market and (b) connection of Iberclear to Target2-Securities technical support, managed by the European Central Bank and the group of eurozone Central Banks.

BME Clearing adapted its clearing services in the equity securities segment to the regulatory and operational changes arising from the implementation of this second phase of the Reform. As a result, fixed income securities trades cleared in the CCP after this date, have been settled in the Iberclear ARCO system, using TARGET2 Securities technical support. The Company's Rule Book was changed (entry into force on 18 September 2017) to include the activities to be carried out as a CCP for fixed income and equity securities, along with financial, interest rate (IRS) and energy derivatives.

Lastly, on 1 June 2017, the Company received authorisation to extend its services as a CCP to GAS contracts (Mercado Ibérico del Gas), with physical delivery, which will form part of the CCP's energy segment.

The Company's activity is subordinated to the interests of the Bolsas y Mercados Españoles Group, the parent of which is Bolsas y Mercados Españoles, Sociedad Holding de Mercados y Sistemas Financieros, S.A., with registered office at Plaza de la Lealtad, 1, Madrid. Bolsas y Mercados Españoles is responsible for preparing the consolidated financial statements. This Group combines all the Spanish companies that administer the securities registration, clearing and settlement systems, central counterparties, secondary markets and multilateral trading systems. The consolidated financial statements of the Bolsas y Mercados Españoles Group for 2018 were prepared and authorised for issue by the Board of Directors at its meeting on 27 February 2019. The consolidated financial statements for 2017 were approved at the General Shareholders' Meeting of Bolsas y Mercados Españoles held on 26 April 2018 and filed at the Madrid Mercantile Registry.

The Company's registered office is at Plaza de la Lealtad, 1, Madrid, although operationally its headquarters are at Calle Tramontana, 2, Las Rozas, Madrid (Note 4.3).

2. Basis for the presentation of the financial statements

2.1 Financial reporting framework applicable to the Company

The accompanying financial statements were prepared by the Directors in accordance with the financial reporting framework applicable to the Company, as set out in:

- a. The Code of Commerce and other mercantile legislation.
- b. The Spanish General Accounting Plan approved by Royal Decree 1514/2007 (amended by Royal Decree 602/2016, of 2 December), and its sector-specific modifications and, in particular, Circular 9/2008, of 10 December, issued by the National Securities Commission (Comisión Nacional del Mercado de Valores or "CNMV") (amended by Circular 5/2016, of 27 July, of the CNMV) (section 2.2 of this Note).
- c. The mandatory standards approved by the Spanish Accounting and Auditing Institute based on the Spanish General Accounting Plan and supplementary standards thereto and those approved by the CNMV applicable to the Company.
- d. All other applicable Spanish accounting standards.

2.2 True and fair view

The accompanying financial statements were obtained from the Company's accounting records and are presented in accordance with the applicable financial reporting framework and, in particular, the accounting principles and criteria contained therein, to give true and fair view of the Company's equity and financial position, and the results of its transactions and cash flows in the year then ended. These financial statements, which were approved by the Company's Board of Directors, will be submitted for approval by the Sole Shareholder. It is expected that they will be approved without modification. The financial statements for 2017 were approved by the Sole Shareholder on 23 April 2018.

The accompanying statements of financial position, income statements, statements of changes in equity and statements of cash flows are presented in compliance with the formats established in Appendix IV of Circular 5/2016, of 27 July, issued by the CNMV.

2.3 Non-obligatory accounting principles applied

No non-obligatory accounting principles were applied. The Board of Directors prepared these financial statements taking into account all mandatory accounting standards and principles with a material effect on the financial statements. All mandatory accounting principles were applied.

2.4 Critical issues regarding valuation and estimation of uncertainty

The Company's profits and the determination of its equity are sensitive to the accounting policies and rules, measurement bases and estimates applied by the Company's directors in the preparation of the financial statements. The main accounting policies and rules and measurement bases used are disclosed in Note 4.

In the preparation of the accompanying financial statements, the Company's Board of Directors makes estimates in order to measure certain of the assets, liabilities, income, expenses and commitments recognised therein. These estimates refer basically to:

- The assessment of potential impairment losses on certain assets (Notes 4.1, 4.2 and 4.4).
- The assumptions used in the actuarial calculation of pension liabilities and other commitments with employees (Note 12).
- The useful life of intangible assets and property, plant and equipment (Notes 4.1 and 4.2).
- The calculation of provisions (Note 12).
- The fair value of certain financial instruments (Note 8).
- Equity-based employee benefits (Note 4.13)
- Recognition of deferred tax assets (Notes 4.6 and 13).

Although these estimates have been made on the basis of the best information available at the close of the 2018 financial year, future events may require them to be modified (upwards or downwards) in future reporting periods. Changes to accounting estimates are applied prospectively.

2.5 Changes in accounting policies

In the financial year 2018, there were no significant changes to accounting criteria compared to the criteria applied in financial year 2017.

2.6 Grouping of items

Certain items in the statement of financial position, income statement, statement of changes in equity and statement of cash flows have been aggregated with other items for easier understanding. However, where the amounts are material, information is disclosed separately in the notes.

2.7 Correction of errors

No significant errors were uncovered in the preparation of the accompanying financial statements that required the restatement of amounts included in the 2017 financial statements.

2.8 Comparison of information

The 2017 information contained in these notes is presented for comparison with the 2018 information.

Unless indicated otherwise, the financial statements are presented in thousands of euros (€).

3. Distribution of profit

The proposed distribution of profit for 2018 and 2017 is as follows:

	Thousands of euros	
	2018	2017 (*)
Interim dividend	9,607	10,601
Final dividend	1,507	1,150
	11,114	11,751

(*) On 23 April 2018, the Sole Shareholder approved the proposed distribution of 2017 profit without modification.

In its meetings of 17 July 2018 and 20 December 2018, the Company's Board of Directors agreed to distribute two dividends from 2018 profit in the amount of €5,842 thousand and €3,765 thousand, respectively. These dividends were paid before the year-end, recognised under "Interim dividend" in "Equity" in the balance sheet at 31 December 2018 (Note 11).

In its meetings of 26 June 2017 and 21 December 2017, the Company's Board of Directors agreed to distribute two dividends from 2017 profit in the amount of €5,137 thousand and €5,464 thousand, respectively. These dividends were paid before the year-end, recognised under "Interim dividend" in "Equity" in the balance sheet at 31 December 2017 (Note 11).

In accordance with the provisions of Article 277 of the Corporate Enterprises Act, the Company's Board of Directors prepared the financial statements immediately prior to approval of the payment of both interim dividends, confirming the existence of sufficient liquidity to pay the interim dividends, as follows:

	Thousands of euros	
	30-06-2018	30-11-2018
Profit for the year available at the dividend date	5,842	9,607
Interim dividend paid in the year	-	(5,842)
Amount available for distribution	5,842	3,765
Available liquidity	45,459	44,169
Interim dividend	(5,842)	(3,765)
Retained earnings	39,617	40,404

	Thousands of euros	
	31-05-2017	30-11-2017
Profit for the year available at the dividend date	5,137	10,601
Interim dividend paid in the year	-	(5,137)
Amount available for distribution	5,137	5,464
Available liquidity	43,020	44,224
Interim dividend	(5,137)	(5,464)
Retained earnings	37,883	38,760

4. Accounting policies and measurement bases

The main recognition and measurement standards applied by the Company in the preparation of the financial statements for 2018 (Note 2.1) were as follows:

4.1 Intangible assets

As a general rule, intangible assets are measured initially at acquisition or production cost. After initial recognition, intangible assets are carried at cost, less accumulated amortisation and any accumulated impairment. These assets are amortised over their useful lives.

Other intangible assets

The Company recognises costs incurred to acquire computer software under this heading.

Also recognised under this heading are the expenditure required to develop software by the Company itself, with a debit to "Own work capitalised" in the income statement provided the following conditions are met:

- The costs are specifically itemised by project and clearly defined.
- There are sound reasons to foresee the project's technical success and economic and commercial profitability.

- Development expenditures that meets these conditions are capitalised and amortised over the useful life (up to a maximum of five years). Computer software maintenance costs are recognised in the income statement for the period in which they are incurred.

The Company amortised its computer software on a straight-line basis over the estimated useful life of the related assets, as follows:

	Years of estimated useful life
Developed internally	5
Acquired from third parties	3

The annual amortisation charge for intangible assets is recognised in the income statement under “Amortisation and depreciation – Amortisation of intangible assets”.

The Company recognises any impairment losses on intangible assets with a balancing entry against “Impairment and gains/(losses) on disposal of fixed assets” in the income statement. The criteria for recognising impairment losses on these assets and any reversals of impairment losses recognised in previous periods are similar to those applied to property, plant and equipment (Note 4.2).

4.2 Property, plant and equipment

Elements of property, plant and equipment are measured at purchase price or production cost. After initial recognition, property, plant and equipment are carried at purchase price or production cost, less accumulated amortization and any accumulated impairment.

The Company amortises its property, plant and equipment on a straight-line basis over the estimated useful life of the assets, as follows:

	Years of estimated useful life
Furniture and installations	10
Data processing equipment	4

The annual depreciation charge for property, plant and equipment is recognised in the income statement under “Amortisation and depreciation – Depreciation of property, plant and equipment”.

Upkeep and maintenance expenses on property, plant and equipment are charged to the income statement in the year in which they are incurred. However, costs incurred which increase capacity or productivity or extend the useful life of the asset are capitalised as part of the cost of the related asset.

At the end of each reporting period and whenever there is any indication that the carrying amount of an item of property, plant and equipment exceeds its recoverable amount, the Company recognises an impairment loss

on the asset, with a balancing entry against "Impairment and gains/(losses) on disposal of fixed assets" in the income statement.

The recoverable amount is the greater of fair value less costs to sell and value in use.

When an impairment loss is reversed, the carrying amount of the asset is increased up to the limit of the carrying amount of the property, plant and equipment that would have been determined had impairment not been recognised in previous reporting periods. Reversals of impairment losses are recognised as income, with a credit to "Impairment and gains/(losses) on disposal of fixed assets" in the income statement.

4.3 Operating leases

Under operating leases, the lessor retains substantially all the risks and rewards incidental to ownership of the leased asset.

The Company only acts as the lessee of the building used as the Company's operating headquarters, which is owned by Bolsas y Mercados Españoles Servicios Corporativos, S.A. Operating lease expenses are charged on a straight-line basis to "Other operating expenses – External Services" in the income statement for this year in which they are accrued (Notes 7 and 15).

Any payment received or made on entering into an operating lease is considered as income received in advance or a prepayment and taken to the income statement over the lease term in accordance with the pattern of economic benefits transferred or received.

4.4 Financial instruments

4.4.1 Financial assets

i. Classification

The Company classifies its financial assets into the following categories:

1. **Loans and receivables:** financial assets arising on the rendering of services in the course of the Company's trade transactions, or those that are neither equity instruments nor derivatives, not arising on trading transactions, with fixed or determinable payments, and which are not traded in an active market. Specifically, this category includes long-term collateral extended, the amounts of which are recognised under "Non-current investments" in the balance sheet (Note 7), the reverse repurchase agreements in which the Company invests its surplus cash, recognised under "Cash and cash equivalents" (Note 10), the balances included in "Trade and other receivables" (Notes 13, 14, 16 and 17) and "Current investments (Group)" (Note 8), the reverse repurchase agreements, deposits given and, as appropriate, other cash equivalents in which the Company invests the funds temporarily obtained as a result of transactions involving the margin deposits that the Company's members are required to make to guarantee the open positions held in the market (see 4.4.2 of this Note), recognised under "Current investments from transactions - Posting collateral from participants" (Note 8) and debit balances for settlement, recognised under "Current investments from transactions – Debit balances for settlement" (Note 8) which includes outstanding balances receivable (for next day settlement) on the daily settlement of losses and gains of futures and daily option trades, presented at the position held by each member (sections 4.4.2 and 4.4.4 of this Note) and the cash debit balances for settlement posted in "Current investments from transactions - Cash receivables for settlement" (Note 8), which includes the Company's collection right for the financing provided to the system for the cash differences of the failed instructions pending settlement in which the Company is involved.
2. **Financial assets held for trading:** includes all positions in derivative instruments (options), equity instruments and fixed income securities (BME Clearing Repo transactions) for which the Company acts as central counterparty clearing house (CCP) and that are recognised under "Current investments from transactions" - Financial instruments in CCP" (Note 8). The positions held in these financial assets are matched by equivalent positions in financial liabilities (sales of derivative instruments, equity securities and fixed income securities) (sections 4.4.2 and 4.4.5 of this Note).

In the accompanying balance sheets, financial assets and liabilities are classified by maturity; those maturing in 12 months or less are classified as "current" and those maturing in over 12 months as "non-current".

ii. Measurement and recognition of gains (losses) on financial assets

Initial measurement

Financial assets are initially measured at the fair value of the consideration given plus directly attributable trade costs. For equity investments in Group companies granting control over the subsidiary, any fees paid to legal advisors or other professionals involved in the acquisition of the investment are recognised directly in the income statement.

Subsequent measurement

Loans and receivables are measured at amortised cost. Accrued interest is recognised in the income statement using the effective interest rate method. However, receivables falling due within one year are measured at the nominal amount, provided that the effect of not discounting the cash flows is immaterial.

Financial assets held for trading are measured using the criteria contained in section 4.4.5 below.

At least at the end of the reporting period, the Company tests its financial assets not measured at fair value for impairment. Objective evidence of impairment is considered to exist when the recoverable amount of the financial asset is lower than its carrying amount.

Specifically, regarding valuation allowances for trade and other receivables, the process of assessing these assets for potential impairment losses is performed individually for the vast majority of financial assets measured at amortised cost.

Impairment losses are recognised under “Impairment and gains/(losses) on disposal of financial instruments” in the income statement. For trade and other receivables, impairment losses are recognised under “Other operating costs – Losses, impairment and changes in trade provisions” in the income statement. If the impairment loss reverses subsequently, the carrying amount is increased, up to the limit of the carrying amount that would have been recorded had the impairment loss not been recognised in prior reporting periods, with a credit to “Other operating costs – losses, impairment and changes in trade provisions” in the case of trade and other receivables and “Impairment and gains/(losses) on disposal of financial instruments” in the case of all other financial assets in the income statement.

iii. Derecognition of financial assets

The Company derecognises a financial asset when the rights to the cash flows from the asset expire or have been transferred, provided that substantially all the risks and rewards of ownership have been transferred (such as binding agreements for sales of assets).

4.4.2 Financial liabilities

Financial liabilities classified for measurement purposes as “Financial liabilities held for trading” are the positions in derivative financial instruments (options), equity securities and fixed income securities (transactions in BME Clearing Repo), for which the Company acts as central counterparty clearing house (CCP), which are recognised under “Current financial liabilities from transactions – Financial instruments in CCP” (Note 8) and whose positions are matched by equivalent positions in financial assets (sections 4.4.1 and 4.4.5 of this Note). Therefore, the criteria applied to these assets are also used to measure these liabilities (previous section).

The Company's remaining financial liabilities are classified as “Debts and payables”, arising on the purchase of goods and services in the course of the Company's trade transactions and financial liabilities that are not derivatives and do not arise on trade transactions. Specifically, this category includes the balances of “Trade and other payables” (Notes 13, 14, 15, 16 and 17), “Current payables to Group companies and associates” (Notes 13 and 17), collateral from market participants recognised under “Current financial liabilities from transactions - Collateral received from participants” (section 4.4.1 of this Note and Note 8), and payables for settlement recognised under “Current financial liabilities from transactions - Payables for settlement” and which include outstanding balances (for next day settlement) on the daily settlement of gains and losses on futures and daily options trades, presented at the position held by each clearing member (sections 4.4.1 and 4.4.4 of this Note) and the balances of cash payables withheld for settlement, which are recognised under the heading “Current financial liabilities from transactions - Cash payables withheld for settlement” (Note 8), corresponding to the cash temporarily withheld from the system due to the cash differences of the failed instructions pending settlement in which the Company is involved.

Accounts payable are initially recognised at the fair value of the consideration received, adjusted by the directly attributable trade costs. These liabilities are subsequently measured at amortised cost. Nonetheless, payables falling due within one year are measured at the nominal amount, provided that the effect of not discounting the cash flows is immaterial.

The Company derecognises a financial liability when the obligation is extinguished.

4.4.3 Equity instruments

An equity instrument represents a residual interest in the assets of the Company after deducting all of its liabilities.

Equity instruments issued by the Company are recognised in equity at the amount received, net of direct issuance costs.

Any own equity instruments acquired by the Company during the year are recognised at the amount of consideration paid and deducted directly from equity under “Own shares and equity holdings”. Any gains and losses on the purchase, sale, issuance or redemption of own equity instruments are recognised directly in equity. No profit or loss may be recognised in the income statement.

The Company did not carry out any transactions with own equity instruments in 2018 and 2017 and did not hold any own equity instruments at 31 December 2018 and 2017.

4.4.4 Balances pending next day settlement for option trades and daily settlement of gains and losses on futures

The Company recognises balances pending next day settlement to each member from daily option trades and daily settlement of gains and losses on futures at the position held by each clearing member and at the same amount in current assets and current liabilities in the balance sheet under “Current investments from

transactions – Receivables for settlement” and “Current financial liabilities from transactions - Payables for settlement”, respectively (sections 4.4.1 and 4.4.2 of this Note and Note 8).

4.4.5 Clearing trades on financial instruments. The Company acts as central counterparty clearing house (CCP)

Positions by holder and/or member resulting from the Company's operation as CCP in purchases and sales of derivative instruments, equity and public debt securities give rise to a financial asset and, simultaneously, for the same amount a financial liability, classified for measurement purposes as “Financial assets held for trading” and “Financial liabilities held for trading”, respectively (sections 4.4.1 and 4.4.2 of this Note). Therefore, according to mercantile law, the Company recognises the financial asset and the corresponding financial liability at its fair value at both initial and subsequent measurement.

Changes in the fair value of derivative instruments for which the Company acts as CCP are recognised as a balancing entry in the corresponding financial asset or financial liability account when the instruments are fully transferred to the members. Therefore, the net effect on the income statement is nil (Note 8).

4.4.6. Processing cash or securities balances over which the Company can retain control during the settlement process.

i. Cash balances:

Once each settlement cycle is completed and until all of the transactions have been settled completely, the settled buy and sell instructions that have different cash generate a cash settlement for the Company as a result of being interposed in all of the instructions. If the cash for the settled purchases is less than that of the settled sales, the Company will have to provide cash in the settlement cycle. Otherwise, if the cash for the unsettled purchases is greater than that of the unsettled sales, the Company would temporarily retain control over the resulting cash.

When the Company temporarily takes or retains control over cash from the settlement (to decide how to apply it later), a financial asset is recognised for the cash amounts thus retained is recorded under Current investments from transactions – Posting cash withheld for settlement” (Note 8) classified for measurement purposes as “Loans and receivables” and its counterparty is a financial liability recognised under “Current financial liabilities from transactions – Cash payables withheld for settlement”, classified for measurement purposes as “Debts and payables”.

As a result of this classification, the financial assets and liabilities are initially recorded at fair value. These assets are later measured at amortised cost, applying the effective interest rate method for the deposit in which the retained cash has been invested.

ii. Securities:

When the Company also temporarily takes control and retains securities designated for settlement, or part of them, the Company recognises a financial asset for the amount of the securities thus retained under “Current investments from transactions – Securities withheld for settlement” (Note 8), classified for measurement purposes as “Held for trading”, and its counterparty can be the Company's cash, collateral from the clearing member or a financial liability. The financial asset is recognised at fair value, both initially and thereafter.

The financial liability is classified as “Debts and payables”, such that it is initially recorded at fair value and thereafter measured at amortised cost, applying the effective interest rate method.

Any changes in the fair value of the securities that the Company has retained are included, insofar as the Company sends them to the clearing members at the time of the sale, against the corresponding financial asset

under “Cash receivables for settlement”, if they generate losses, or with credit to the corresponding financial asset under “Cash payables for settlement” if they generate gains, and in this case they would have no impact on the income statement.

4.4.7. Criteria applied to settlement fails due to insufficient securities mitigated by securities borrowing

When during the standard settlement process a default arises due to failed securities delivery and the Company has borrowed securities to assign them to the short-selling member so that said member delivers them and settles the short sale (execution of the loan), the Company must remove the financial asset and the corresponding financial liability generated as a result of the withheld cash or under “Cash receivables for settlement” if the cash differences have been covered.

Insofar as the Company does not assume the risks and rewards involved in owning loaned securities, it does not have to recognise any assets or liabilities for those securities. However, the Company submits information on the market value of the borrowed and loaned securities that are in progress at year-end (Note 8 a) iii).

Since the migration on 18 September 2017 to the Target2Securities (T2S) settlement platform of the Eurosystem (Note 1), the Company no longer applies this incident management system.

4.4.8. Accounting treatment applied to defaults due to failed securities delivery. Buy-ins

When a member who short sells securities, at the end of the standard settlement period, has not provided the securities to be delivered and a securities loan could not be set up, and the Company orders a buy-in to obtain the securities not provided by that short-selling member, the Company, once the buy-in has taken place, settles that buy-in by debiting the short-selling member the amount of the buy-in, thereupon releasing the complete settlement of the transactions involved.

4.4.9. Malfunctions in the standard settlement system. Cash settlement.

When the securities buy-in could not take place due to unavailable securities within the legally-established period, the Company performs the cash settlement of the settlement instructions for the affected sell and buy positions. Cash settlement involves a clearing debit from the failed seller and a credit to the affected buyer. The Company does not record any impact in the income statement, and only recognises the financial assets and liabilities debited from or credited to the members under "Cash receivables for settlement" or "Cash payables for settlement".

4.4.10. Default due to failed cash delivery. Selling securities.

When a buying member does not provide the cash to pay for securities purchases to be settled, the Company can stand in for the member in its cash payment obligations and, if necessary, receive the securities that should have been delivered to the buyer.

Once the final standard settlement period to receive the cash that a buying member has not provided, if the Company has had to order a sale, using the securities provided by selling members that were retained and not delivered to that buying member, once the sale has taken place, the Company removes the security in the financial asset books. The Company applies the cash gained through that sale to either reimburse the cash that the Company provided or to cancel the financial liabilities recorded with the lender.

4.5 Foreign currency trades

The Company's functional currency is the euro. Therefore, transactions in currencies other than the euro are considered to be denominated in foreign currency and are recognised applying the exchange rates in force on the corresponding transaction dates.

At the end of the reporting period, monetary items denominated in foreign currency are translated applying the exchange rate at the balance sheet date. Exchange gains and losses are recognised directly in the income statement for the reporting period in which they occur under "Exchange gains/(losses)".

The Company did not carry out any significant foreign currency trades in 2018 and 2017 and did not have any significant balances in foreign currency at 31 December 2018 and 2017.

4.6 Income tax

Tax expense (tax income) comprises current tax expense (income) and deferred tax expense (income).

Current tax is the amount of taxes payable by the Company as a result of income tax or other tax settlements for a period. Tax credits and other tax benefits, excluding tax withholdings and prepayments, and tax loss carryforwards from prior years and effectively applied in the current year, reduce the current income tax expense.

The deferred tax expense or income relates to the recognition and derecognition of deferred tax assets and liabilities. These include the temporary differences, measured at the amount expected to be payable or recoverable, between the carrying amounts of assets and liabilities and their tax bases, as well as unused tax losses and tax credits. These amounts are measured by applying the tax rate at which the asset is expected to be realised or the liability is expected to be settled to the temporary difference or tax asset.

On 16 February 2016, the Spanish Accounting and Auditing Institute's Resolution of 9 February 2016, was published in the Official State Gazette (BOE), implementing the policies, measurement bases and preparation criteria for financial statements to account for income tax. The Resolution governs the regulatory implementation of the recognition and measurement criteria established in the General Accounting Plan and replaces previous resolutions issued by the ICAC on this subject.

It introduces various amendments such as a review of the criteria for recognising deferred tax assets, whereby the limit on not activating tax loss carryforwards or other tax assets expected to be recovered in more than ten years from the end of the period is eliminated, or deferred tax liabilities relating to the deductibility of impairment losses on goodwill and their systematic amortisation. The Resolution also clarifies the criteria to follow in accounting for income tax expense in the separate financial statements of the companies that pay taxes under a special tax regime, independently of the agreements in place between Group companies for sharing the tax burden. The policy followed by the Bolsas y Mercados Españolas Group with regard to the distribution of consolidated income tax is to allocate the consolidated income tax payable on a proportional basis to the taxable profit of each company in the tax group. Therefore, the Resolution has not had a material impact on the Company. The consolidated tax payable attributable to the Company, net of prepaid taxes and withholdings, which represents a debt with Bolsas y Mercados Españoles, is recognised under "Current payables to Group companies and associates" in the balance sheet (Notes 13 and 17).

Royal Decree-Law 3/2016 of 2 December was published in the Official State Gazette on 3 December 2016, adopting tax measures aimed at consolidating public finances and other urgent measures in the social domain. In regard to Income Tax, this Royal Decree includes the following measures, applicable for tax years beginning on or after 1 January 2016:

- Restriction on the use of tax loss carryforwards: the use of tax loss carryforwards from previous years for large companies (with turnover of more than €60 million) is limited to 25% of taxable income.
- Limits on deductions for double taxation: a new limit is established for deductions on international or domestic double taxation, generated or pending clearing, of 50% of the full amount for companies with a net turnover of at least €20 million.
- Reversal of impairment losses on investments: the reversal of impairment losses on investments that were tax deductible in tax periods prior to 2013 must be made on a linear manner over five years, at a minimum annual amount.

Deferred tax liabilities are recognised for all taxable temporary differences, except for those arising from the initial recognition of goodwill or of other assets and liabilities in a transaction that is not a business combination and affects neither accounting nor taxable profit/(loss).

Deferred tax assets are only recognised to the extent that it is probable that the Company will have future taxable income available to enable their application.

Deferred tax assets and liabilities arising from transactions charged or credited directly to equity are also recognised with a balancing entry in equity.

At the end of each reporting period, the Company reassess the deferred tax assets recognised, making appropriate adjustments where there are doubts as to their future recoverability. Likewise, at each reporting date, unrecognised deferred tax assets are reassessed and recognised to the extent that it has become probable that taxable profit will be available against which the asset can be utilised.

On 23 December 2002, Bolsas y Mercados Españoles submitted a request to file taxes under the consolidated tax regime for the group of which Bolsas y Mercados Españoles has been the parent company since 1 January 2003, whereby such group also includes the Company.

4.7 Income and expenses

Income and expenses are recognised on an accrual basis, i.e. when the actual flow of the goods and services they represent occurs, regardless of when the resulting monetary or financial flow arises. Income is measured at the fair value of the consideration received, less any discounts and taxes.

Income from the rendering of services is recognised in the income statement for the period on an accrual basis in accordance with the tariffs established by the Company (Note 16). Specifically:

- Income from "Access charges for infrastructures and other facilities" includes the general membership fee and the fees for membership to the various contract groups, as well as fees for inclusion as clearing member, where appropriate. This heading also includes income from the Company's appointment as CCP for clearing and central counterparty for buying and selling securities listed for trading in official secondary markets and multilateral trading and financial derivatives systems, in accordance with signed agreements (Note 16).
- Income from "Clearing, and central counterparty" includes income accrued from the fees received by the Company for settlement and clearing of equity futures and options and IBEX 35® index and other index futures and options, and settlement and clearing of fixed income security transactions and clearing equity security transactions in the central counterparty, OTC interest-rate derivatives, energy derivatives and the maintenance of positions in all segments. This item also includes income from transfers and the creation and release of pledges on securities. The costs and expenses that the Company has incurred arising from the fails management described in section 4.4.7 to 4.4.10 above, together with the related default penalties, will be charged to the clearing member responsible for the position with respect to which the settlement fail arose. The costs and expenses are not recognised in the income statement insofar as the Company is entitled to pass them on. However, the penalties to which the Company is entitled are recorded as income in the relevant heading of the income statement. This income is accrued and recognised in the income statement when settlement takes place (Note 16).
- Income from "IT and Consulting", which are accrued and recognised in the income statement as the services and rendered (Note 16).

The company earns financial income from its clearing house activities and interest income on the funds held in guarantee for market members (Note 8) recognised with a credit (charge in the case of a negative return) to "Financial expenses – From marketable securities and other financial instruments" and a charge (credit in the case of a negative return) to "Financial expenses – Collateral from participants", respectively, on the income statements (Note 8). Similarly, when the funds provided are deposited with Banco de España, the penalty corresponding to the negative interest rate of the deposit facility that Banco de España charges to the Company is recognised as a charge to "Financial expenses – Collateral from participants" and the transfer of this cost to the members with a credit to "Financial income – From marketable securities and other financial instruments" on the income statements (Note 8).

Interest received on financial assets is recognised using the effective interest rate method. In any event, interest accrued on financial assets after acquisition is recognised as income in the income statement.

4.8 Provisions and contingencies

In preparing the financial statements, the Company's Directors distinguish, where appropriate, between:

- a. Provisions: amounts payable for present obligations arising from past events, the settlement of which is expected to result in an outflow of resources, but which are uncertain as to their amount and/or timing.
- b. Contingent liabilities: possible obligations arising from past events and whose future existence will be confirmed by the occurrence or non-occurrence of one or more future events not wholly within the control of the Company.
- c. Contingent assets: possible assets arising from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or uncertain future events not wholly within the control of the Company. Contingent assets are not recognised in either the balance sheet or the income statement, but are disclosed in the accompanying notes when an inflow of resources embodying economic benefits is probable.

The financial statements include all the provisions with respect to which it is considered more likely than not that the obligation will have to be settled. Contingent liabilities are not recognised in the financial statements, but rather are disclosed in the notes, unless the possibility of an outflow of economic benefits is considered remote.

Provisions are recognised at the present value of the best possible estimate of the consideration required to settle or transfer the obligation, taking into account the information available concerning the event and its consequences. Where discounting is used, adjustments made to provisions are recognised as a financial expense on an accrual basis.

The compensation to be received from a third party on settlement of the obligation is recognised as an asset, provided that there are no doubts that the reimbursement will take place, unless there is a legal relationship whereby a portion of the risk has been externalised as a result of which the Company is not liable; in this situation, the compensation will be taken into account for the purpose of estimating the amount of the related provision that should be recognised.

At 31 December 2018 and 2017, there were no provisions or contingent assets other than those described in Note 12.

4.9 Termination benefits

Under current legislation, the Company is required to pay termination benefits to employees terminated under certain conditions. Therefore, termination benefits that can be reasonably quantified are recognised, where appropriate, as an expense in the year in which the decision to terminate the employment relationship is taken, under "Staff costs – Wages, salaries and similar expenses" in the income statement (Note 14). Under "Staff costs – Wages, salaries and similar expenses" in the income statement (Note 14) the Company recognised the expense incurred corresponding to the incentive-based redundancy plan approved by the Group's Directors in 2018, which was restricted to a reduced group of employees that met specific characteristics. The amounts outstanding are detailed, where relevant, on the liabilities side of the statement of financial position at the close of the financial year under "Other long-term employee benefits" (Note 12). There was no detailed redundancy plan warranting recognition of a provision in this connection at 31 December 2018 except for the abovementioned incentive-based plan.

4.10 Environmental assets

Environmental assets are deemed to be assets used on a lasting basis in the Company's transactions whose main purpose is to minimise environmental impact and protect and improve the environment, including the reduction or elimination of future pollution.

In view of the business activities carried on by the Company, it does not have any environmental liabilities, expenses, assets, provisions or contingencies that might be material with respect to its equity, financial position or results. Therefore, no specific disclosures relating to environmental issues are included in these notes to the financial statements.

4.11 Pension obligations

i. Post-employment obligations

Post-employment obligations are classified as "defined contribution obligations" when the Company pays fixed contributions into a separate entity (recognised under "Staff costs" in the income statement) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. All other post-employment benefit plans are "defined benefit obligations".

Defined-benefit plans

The Company recognises under "Non-current provisions" on the liabilities side of the balance sheet the present value of any defined-benefit post-employment obligations, net of the fair value of the plan assets and the past service cost deferred, as explained below.

If the treatment described in the previous paragraph gives rise to an asset, it is recognised under “Non-current investments” of the balance sheet assets up to the present value of any economic benefits that could return to the Company in the form of direct refunds from the plan or reductions in future payments to the plan, plus, where applicable, any unrecognised past service costs. Any adjustments to be made to the measurement of a post-employment benefits asset are recognised directly in equity as reserves.

The “plan assets” are those assets that will be used directly to settle the obligations and meet the following conditions:

- They are not held by the Company, but by a legally separate entity that is not a related party of the Bolsas y Mercados Españoles Group.
- They are only available to pay or fund post-employment benefits and cannot be returned to the Company unless the remaining assets of the plan are sufficient to meet all the related employee benefit obligations of the plan or the entity with current or former employees, or they are returned to the Company to reimburse it for employee benefits already paid.

“Past service cost” arising on amendments to existing post-employment benefits or on the introduction of new benefits are recognised in the income statement on a straight-line basis over the period from the time the new benefits arise to the time when the employee has an irrevocable right to receive the new benefits.

Post-employment benefits are recognised in the income statement as follows:

- Current service cost (understood to be the increase in the present value of the obligations resulting from employee service in the current period), including the amortisation of unrecognised past service cost, under “Staff costs – Provisions and other staff costs” on the income statement.
- Interest expense (understood to be the increase during the period in the present value of the obligations resulting from the passage of time), under “Financial expenses – Provision adjustments” in the income statement.
- The expected return on assets assigned to the obligations and the gains and losses therein, minus any cost for administering the plan and related taxes, under “Finance costs – Provision adjustments” in the income statement.

Actuarial gains and losses are recognised directly in equity as reserves.

The defined benefit post-employment obligations held by the Company include:

- Retirement bonus commitments in connection with the obligation undertaken by the Company to pay a bonus to employees who leave the company upon reaching the age of 65.

The Company has externalised the retirement bonus commitments, using as the vehicle an insurance policy written with Aegón España, S.A. de Seguros y Reaseguros.

- Health benefit commitments, understood as the obligation, restricted to a specific number of Company employees, to take out health insurance to supplement the social security medical coverage. The policy covers current employees and their beneficiaries, defined as those entitled to health care under the state Social Security scheme under the same social security number as the employee, as regulated by prevailing social security legislation, and those retiring after this agreement came into effect and their beneficiaries (as

defined above, plus those becoming widows/widowers and orphans after the agreement comes into effect that are also stipulated beneficiaries of the policy holder).

ii. Other long-term employee benefits

The Company, under the terms of the extra-statutory collective bargaining agreement, has undertaken to pay a bonus to certain employees for good conduct and outstanding qualities, demonstrated by loyalty as reflected in the number of years of ongoing service, after 25, 35 and 45 years of effective service (Note 12).

The accounting treatment of “Other long-term employee benefits” is as described above for defined-benefit post-employment plans, except that the actuarial gains and losses are recognised in the income statement under “Staff costs – Wages, salaries and similar expenses”.

4.12 Related party trades

The Company performs all its transactions with related parties on an arm's length basis. In addition, the transfer prices are adequately supported and, therefore, the Company's Directors consider that there are no material risks in this connection that might give rise to significant liabilities in the future (Note 17).

4.13 Share-based payment arrangements

2014-2019 Plan (Pluri-Annual Share-Based Variable Remuneration Plan)

On 30 April 2014, pursuant to Article 219 of the Spanish Corporate Enterprises Act and other applicable legislation, the Ordinary General Shareholders' Meeting approved a medium-term variable remuneration plan (“2014-2019 Plan”) to be applied by the Company and its subsidiaries and intended for members of the management team, including Executive Directors.

The 2014-2019 Plan consists of the promise to deliver ordinary shares of BME to Executive Directors, Senior Management and lower management of Group companies who have been designated as beneficiaries of this plan. The 2014-2019 Plan entails assigning a number of shares to beneficiaries in financial years 2014, 2015 and 2016, as the basis for calculating the BME shares to be delivered to the beneficiaries, if appropriate, subject to fulfilment of the objectives set forth in the 2014-2019 Plan.

The number of BME shares to be granted to each 2014-2019 Plan beneficiary, provided the conditions are met, will be equal to the result of multiplying the number of units allocated, by a coefficient of 0 to 1.5, which will be established based on the performance of BME's Total Shareholder Return (TSR) and Efficiency Ratio (ER) during the periods (i) 1 January 2014 to 31 December 2016, (ii) 1 January 2015 to 31 December 2017, and (iii) 1 January 2016 to 31 December 2018, compared with the performance of those indicators for five benchmark companies over the same periods, in accordance with the following scale, separately weighting 50% for each of the aforementioned indicators:

BME's position in the ranking	Coefficient
1	1.5
2	1
3	0.8
4	0.6
5	0
6	0

The number of units, convertible into shares, attributable to the designated beneficiaries of the 2014-2019 Plan for the first, second and third three-year periods, was allocated in 2014, 2015 and 2016. The maximum number of BME shares included in the 2014-2019 Pluri-Annual Share-Based Variable Remuneration Plan is 555,048 shares. The total units allocated totalled 118,768, 112,422 and 124,142, which were for a maximum number of theoretical shares of 178,152, 168,633 and 186,213. Of the total units assigned at the BME Group level, the number of units attributable to employees of the Company corresponding to the first, second and third three-years periods of the Programme was established at 6,847, 8,141 and 8,812, respectively, corresponding to a theoretical number of shares deliverable of 10,271, 12,212 and 13,218, respectively.

Since the remuneration consists of an equity-settled share-based payment and the fair value of the services received by the 2014-2019 Plan beneficiaries cannot be estimated reliably, this amount was determined indirectly by reference to the fair value of the equity instruments granted (BME shares).

In this connection, with the exception of market-based performance features, transfer terms under the 2014-2019 Plan are not taken into consideration to estimate the fair value of the equity instruments granted. Non-market performance features are considered by adjusting the number of shares included in the measurement of the costs of employee (beneficiary) service, so that ultimately, the amount recognised on the income statement reflects the number of shares transferred. With respect to the market performance features, the charge for services received is recognised regardless of whether or not the market conditions are met, although non-market performance conditions must be fulfilled. Share price volatility was estimated using the historical volatility of BME's shares in the 750 trading sessions prior to 30 December. In particular, at least at the end of every accounting period, the number of BME shares to be delivered to each beneficiary associated with the Efficiency Ratio ("ER") shall be recalculated, since this is not an indicator that is subject to market conditions.

In view of the nature of this Incentives Plan, it was deemed advisable to base its valuation on a model that generates a large number of scenarios (10,000), using the Monte Carlo Method. The share price scenarios were generated based on daily volatility and correlations observed in the historic share performance series of BME and the benchmark companies for the three years immediately prior to the valuation date, taking into account the following variables:

	First three-year period	Second three-year period	Third three-year period
Price of the underlying asset (euros)	29.83	36.45	29.06
Risk-free interest rate	0.329%	-0.079%	-0.303%
Volatility of underlying shares	26.46%	24.88%	25.77%
Expected duration of the Plan	3 years	3 years	3 years

On 31 December 2016, the first three-year period of the 2014-2019 Plan expired. The Appointments and Remuneration Committee, in its 24 May 2017 meeting, validated the coefficients applicable to the theoretical units convertible into shares assigned to each beneficiary of the first three-year period of the 2014-2019 Plan at 1.5 for the efficiency ratio and 0 for Total Shareholder Return (TSR), putting the number of shares at 88,713, equivalent to the amount of €2,799 thousand (including €9 thousand attributable to the 50% accrued by in Infobolsa, S.A. - Sociedad Unipersonal, currently known as Bolsas y Mercados Españoles Inntech, S.A.U. until its full integration into the Group), with 53,301 shares, equivalent to €1,682 thousand, delivered in June 2017, once the withholdings set forth in tax legislation had been applied. Of all shares delivered at BME Group level, the number of shares delivered to Company employees, once the withholdings set forth in tax legislation had been applied, amounted to 3,177 shares, equivalent to €100 thousand.

The second three-year period of the 2014-2019 Plan expired on 31 December 2017. The Appointments and Remuneration Committee, in its 28 May 2018 meeting, validated the coefficients applicable to the theoretical units convertible into shares assigned to each beneficiary of the second three-year period of the 2014-2019 Plan. The coefficients were 1.5 in the case of the efficiency ratio and 0 in the case of total shareholder return (TSR), resulting in 84,286 shares, equivalent to €2,529 thousand. In June 2018, once the withholdings set forth in the prevailing tax legislation had been applied, 50,550 shares, equivalent to €1,517 thousand, were applied. Of all shares delivered at BME Group level, the number of shares delivered to Company employees, once the withholdings set forth in tax legislation had been applied, amounted to 3,758 shares, equivalent to €113 thousand.

The third three-year period of the 2014-2019 Plan matured on 31 December 2018, with the settlement due to take place in 2019.

2017-2020 Plan (Medium-Term Share-Based Variable Remuneration Plan)

On 27 April 2017, pursuant to Article 219 of the Spanish Corporate Enterprises Act and other applicable legislation, the Ordinary General Shareholders' Meeting approved a medium-term share-based remuneration plan ("2017-2020 Plan") to be applied by the Company and its subsidiaries and intended for members of the management team, including Executive Directors.

The 2017-2020 Plan consists of the promise to deliver ordinary shares of BME to Executive Directors, Senior Management and lower management of Group companies who have been designated as beneficiaries of this plan. The 2017-2020 Plan entails allocating a number of shares to beneficiaries in 2017, as the basis for

calculating the BME shares to be delivered to the beneficiaries, if appropriate, subject to fulfilment of the objectives set forth in the 2017-2020 Plan.

The number of BME shares to be granted to each 2017-2020 Plan beneficiary, provided the conditions are met, will be equal to the result of multiplying the number of units allocated, by a coefficient of 0 to 1.5, which will be established based on the performance of BME's Total Shareholder Return (TSR) and Efficiency Ratio (ER) during the periods 1 January 2017 to 31 December 2019, compared with the performance of those indicators for five benchmark companies over the same periods, in accordance with the following scale, separately weighting 50% for each of the aforementioned indicators:

BME's position in the ranking	Coefficient
1	1.5
2	1
3	0.8
4	0.6
5	0
6	0

The number of units, convertible in shares, attributable to the designated beneficiaries of the 2017-2020 Plan were allocated in 2017. The maximum number of BME shares included in the 2017-2020 Medium-Term Share-Based Variable Remuneration Plan is 190,263 shares. The total number of units allocated was 103,566 which were for a maximum number of theoretical shares of 155,349. Of the total units allocated at the BME Group level, the number of units convertible into shares attributable to employees of the Company corresponding to the first third three-year periods of the Plan was established at 7,337, corresponding to a theoretical maximum number of shares deliverable of 11,006.

Since the remuneration consists of an equity-settled share-based payment and the fair value of the services received by the 2017-2020 Plan beneficiaries cannot be estimated reliably, this amount was determined indirectly by reference to the fair value of the equity instruments granted (BME shares).

In this connection, with the exception of market-based performance features, transfer terms under the 2017-2020 Plan are not taken into consideration to estimate the fair value of the equity instruments granted. Non-market performance features are considered by adjusting the number of shares included in the measurement of the costs of employee (beneficiary) service, so that ultimately, the amount recognised on the income statement reflects the number of shares transferred. With respect to the market performance features, the charge for services received is recognised regardless of whether or not the market conditions are met, although non-market performance conditions must be fulfilled. Share price volatility was estimated using the historical volatility of BME's shares in the 750 trading sessions prior to 30 December. In particular, at least at the end of every accounting period, the number of BME shares to be delivered to each beneficiary associated with the Efficiency Ratio ("ER") shall be recalculated, since this is not an indicator that is subject to market conditions.

In view of the nature of this Incentives Plan, it was deemed advisable to base its valuation on a model that generates a large number of scenarios (10,000), using the Monte Carlo Method. The share price scenarios were generated based on daily volatility and correlations observed in the historic share performance series of BME and the benchmark companies for the three years immediately prior to the valuation date, taking into account the following variables:

	One three-year period
Price of the underlying asset (euros)	28.06
Risk-free interest rate	-0.78%
Volatility of underlying shares	23.11%
Expected duration of the Plan	3 years

2018-2023 Plan (Pluri-Annual Share-Based Variable Remuneration Plan)

On 26 April 2018, pursuant to Article 219 of the Corporate Enterprises Act and other applicable legislation, the Ordinary General Shareholders' Meeting approved a medium- and long-term remuneration plan ("2018-2023 Plan") to be applied by the Company and its subsidiaries and intended for members of the management team, including Executive Directors.

The 2018-2023 Plan consists of the promise to deliver ordinary shares of BME to Executive Directors, Senior Management and lower management of Group companies who have been designated as beneficiaries of this plan. The 2018-2023 Plan entails allocating a number of shares to beneficiaries in financial years 2018, 2019 and 2020, as the basis for calculating the BME shares to be delivered to the beneficiaries of the Plan in 2021, 2022 and 2023, provided that the established requirements are met.

The number of BME shares to be granted to each 2018-2023 Plan beneficiary, provided the conditions are met, will be equal to the result of multiplying the number of units assigned, by a coefficient of 0 to 1.5, which will be established based on the evolution of BME's Total Shareholder Return (TSR) and Efficiency Ratio (ER) during the periods (i) 1 January 2018 to 31 December 2020, (ii) 1 January 2019 to 31 December 2021, and (iii) 1 January 2020 to 31 December 2022, compared with the evolution of those indicators for five benchmark companies over the same periods, in accordance with the following scale, separately weighting 50% for each of the aforementioned indicators:

BME's position in the ranking	Coefficient
1	1.5
2	1.2
3	0.8
4	0.4
5	0
6	0

The number of units, convertible in shares, attributable to the designated beneficiaries of the 2018-2023 Plan corresponding to the first three-year period, respectively, were assigned in 2018. The maximum number of BME shares included in the 2018-2023 Pluri-Annual Share-Based Variable Remuneration Plan is 486,003 shares. The total number of units assigned to the first year of the 2018-2023 plan was 105,820 which correspond to a maximum number of theoretical shares of 158,730. Of the total units assigned at the BME Group level, the number of units convertible into shares attributable to employees of the Company corresponding to the first three-year periods of the Programme was established at 6,417, corresponding to a theoretical maximum number of shares deliverable of 9,626.

Since the remuneration consists of an equity-settled share-based payment and the fair value of the services received by the 2018-2023 Plan beneficiaries cannot be estimated reliably, this amount was determined indirectly by reference to the fair value of the equity instruments granted (BME shares).

In this connection, with the exception of market-based performance features, transfer terms under the 2018-2023 Plan are not taken into consideration to estimate the fair value of the equity instruments granted. Non-market performance features are considered by adjusting the number of shares included in the measurement of the costs of employee (beneficiary) service, so that ultimately, the amount recognised on the income statement reflects the number of shares transferred. With respect to the market performance features, the charge for services received is recognised regardless of whether or not the market conditions are met, although non-market performance conditions must be fulfilled. Share price volatility was estimated using the historical volatility of BME's shares in the 750 trading sessions prior to 30 December.

In view of the nature of this Incentives Plan, it was deemed advisable to base its valuation on a model that generates a large number of scenarios (10,000), using the Monte Carlo Method. The share price scenarios were generated based on daily volatility and correlations observed in the historic share performance series of BME and the benchmark companies for the three years immediately prior to the valuation date, taking into account the following variables:

	First three-year period
Price of the underlying asset (euros)	26.55
Risk-free interest rate	-0.54%
Volatility of underlying shares	23.62%
Expected duration of the Plan	3 years

As a result, a staff cost for the Pluri-Annual Share-Based Variable Remuneration Plans (2014-2019 Plan and 2018-2023 Plan) and the Medium-Term Share-Based Variable Remuneration Plan (2017-2020 Plan) is recognised in accordance with the services provided by Company employees who are beneficiaries with a credit to Equity (under "Other equity holder contributions"), calculated based on the fair value of the equity instruments transferred (shares of Bolsas y Mercados Españoles) at the date when the grant of shares was approved. The services provided were recognised in profit and loss over the specific period during which the employees rendered services to the Company.

4.14 Statement of cash flows

The following terms are used on the statements of cash flows:

- Cash flows are inflows and outflows of cash and cash equivalents.
- Operating activities: the principal revenue-producing activities of the Company and other activities that are not investing or financing activities.
- Investment activities are the acquisition and disposal of long-term assets and other investments not included in cash equivalents.
- Financing activities are activities that result in changes to the size and composition of equity and borrowings of the Company.

To prepare the statements of cash flow, the operating activities cash flows generated by current financial assets and liabilities from transactions (Notes 4.4. and 8) are included in the statement of cash flow at their net value.

Also, for the purposes of preparing the statements of cash flows, "Cash and cash equivalents" are understood to be current highly liquid investments that are subject to an insignificant risk of changes in value, and which do not constitute current investments from transactions (Notes 4.4. and 8).

4.15 Statements of changes in equity

The statements of changes in equity presented in these financial statements show all changes in net equity during the year. This information is presented in two statements: the statement of recognised income and expense, and the statement of total changes in equity. The main features of the information contained in each is explained below:

Statements of recognised income and expense

The statement of recognised income and expenses presents the income and expenses generated by the Company as a result of its activity during the year, distinguishing between items of income and expenses that are recognised in profit and loss for the year and other income and expenses that, as required under current regulations, are recognised directly in equity.

This financial statement therefore presents, as appropriate:

- a. Profit or loss for the period.
- b. Income and expenses that, as required by the measurement standards, must be recognised directly in the Company's equity.
- c. Amounts transferred to the income statement in accordance with the measurement standards adopted.
- d. The related tax effect, if any, to letters b) and c) above.
- e. Total recognised income and expense, calculated as the sum of all the letters above.

Statement of total changes in equity

This part of the statement of changes in equity reflects all changes in equity, including any due to changes in accounting policies and corrections of errors. This statement accordingly presents a reconciliation between the carrying amount of each component of equity at the beginning and the end of the period, separately disclosing each change into the following headings:

- a. Adjustments for changes in accounting criteria and adjustments for errors: include any changes in equity arising from the retrospective restatement of financial statement balances due to changes in accounting criteria or for the correction of errors.
- b. Total recognised income and expense: comprises an aggregate of all the aforementioned items recognised in the statement of recognised income and expense.
- c. Transactions with shareholders: changes in equity due to dividend payments, capital increases (decreases), share-based payments, etc.

- d. Other changes in equity: other items recognised in equity, such as distribution of profit, transfers between equity items and any other increase or decrease in equity.

4.16 Current/non-current classification

Assets classified as current assets are all those related to the company's normal operating cycle, generally one year, and other assets expected to mature, or to be sold or realised in the short term from the end of the reporting period, and cash and cash equivalents. Any assets that do not fulfil these criteria are classified as non-current.

Similarly, liabilities associated with the normal operating cycle and, in general, all liabilities expected to fall due or be extinguished in the short term are classified as current liabilities. Any other liabilities are classified as non-current.

5. Intangible assets

The changes under this balance sheet heading in 2018 and 2017 were as follows:

Item	Thousands of euros			
	Computer software		Industrial property	Total
	Developed internally	Purchased		
Cost:				
Balances at 1 January 2017	5,579	5,796	29	11,404
Additions	-	80	-	80
Disposals	-	-	-	-
Balances at 31 December 2017	5,579	5,876	29	11,484
Additions	118	3	-	121
Disposals	-	-	-	-
Balances at 31 December 2018	5,697	5,879	29	11,605
Accumulated amortisation:				
Balances at 1 January 2017	(744)	(4,401)	(29)	(5,174)
Charge for the year	(1,116)	(376)	-	(1,492)
Disposals	-	-	-	-
Balances at 31 December 2017	(1,860)	(4,777)	(29)	(6,666)
Charge for the year	(1,116)	(379)	-	(1,495)
Disposals	-	-	-	-
Balances at 31 December 2018	(2,976)	(5,156)	(29)	(8,161)
Intangible assets, net				
Net balances at 31 December 2017	3,719	1,099	-	4,818
Net balances at 31 December 2018	2,721	723	-	3,444

All of the additions due to internal developments in 2018 were recognised with a credit to "Own work capitalised" in the income statements and correspond to the developments associated with the provision of new services (clearing of currency futures), which are in progress as of 31 December 2018 and are not subject to amortisation until the date of entry into operation.

Fully amortised items of intangible assets still in use amounted to €4,115 thousand at 31 December 2018 (€4,098 thousand at 31 December 2017).

No impairment losses were identified in either 2018 or 2017 that affect these items on the balance sheet.

6. Property, plant and equipment

The changes in "Property, plant and equipment" in 2018 and 2017 were as follows:

	Thousands of euros		
	Furniture and installations	Data processing equipment	Total
Cost:			
Balances at 1 January 2017	965	2,714	3,679
Additions	-	11	11
Disposals	(62)	(9)	(71)
Balances at 31 December 2017	903	2,716	3,619
Additions	-	25	25
Disposals	-	(8)	(8)
Balances at 31 December 2018	903	2,733	3,636
Accumulated depreciation:			
Balances at 1 January 2017	(937)	(2,560)	(3,497)
Charge for the year	(3)	(63)	(66)
Disposals	62	9	71
Balances at 31 December 2017	(878)	(2,614)	(3,492)
Charge for the year	(3)	(42)	(45)
Disposals	-	8	8
Balances at 31 December 2018	(881)	(2,648)	(3,529)
Property, plant and equipment, net:			
Net balances at 31 December 2017	25	102	127
Net balances at 31 December 2018	22	85	107

Fully depreciated items of property, plant and equipment still in use amounted to €3,443 thousand at 31 December 2018 (€3,333 thousand at 31 December 2017).

No impairment losses were identified in either 2018 or 2017 that affect these items on the balance sheet.

Data processing equipment in the amount of €8 thousand was disposed of in 2018 (€9 thousand in data processing equipment and €62 thousand in furniture and installations in 2017), consisting of fully depreciated items that had ceased to be useful for the Company's activities.

The Company has arranged insurance policies to cover the possible risks to which the various components of property, plant and equipment are exposed.

7. Non-current investments

The breakdown of “Non-current investments” at 31 December 2018 and 2017 is as follows:

Category \ Class	Thousands of euros	
	Other financial assets	
	2018	2017
Loans and receivables	184	180
	184	180

At 31 December 2018 and 2017, “Loans and receivables” included the amounts of cash delivered by the Company as collateral for the Organised GAS Market (Mercado Ibérico del Gas) (Note 1) and deposits on leases (Notes 4.3 and 17).

8. Current investments (Group and from transactions) and current financial liabilities from transactions

a) Current investments (Group and from transactions)

i. Breakdown

At 31 December 2018 and 2017, the breakdown of this balance sheet heading by classification for measurement purposes, origin, currency and class of the transactions, is as follows:

	Thousands of euros			
	2018		2017	
	Group	From transactions	Group	From transactions
Classification for measurement purposes:				
Financial assets held for trading	-	11,536,489	-	18,934,329
Loans and receivables	6,247	2,325,921	6,723	3,181,971
	6,247	13,862,410	6,723	22,116,300
Source and classification for presentation:				
Current investments (Group)	6,247	-	6,723	-
Current investments from transactions-				
Posting collateral from participants	-	2,299,142	-	3,153,196
Financial instruments in CCP	-	11,536,489	-	18,934,329
Receivables for settlement	-	25,244	-	28,752

Cash receivables for settlement	-	-	-	23
	6,247	13,862,410	6,723	22,116,300
Less - Impairment losses	-	-	-	-
Total financial assets	6,247	13,862,410	6,723	22,116,300

ii. Current investments (Group)

Loans and receivables

The total balance of this category at 31 December 2018 and 2017 related to the collateral amount required by Banco de España from the Company made in a blocked current account with Banco de España to guarantee that payments are immediately made in the event a cash settlement fails. Banco de España calculates this collateral quarterly, adjusting the blocked amount in the current account with the same frequency.

The penalty for the negative interest rate of the deposit facility that Banco de España charged to the Company in 2018 was €67 thousand (€128 thousand in 2017) which was recognised under "Financial expenses - Third-party borrowings" in the income statement.

iii. Current investments from transactions

a) Financial instruments in CCP

Details at each month end of all fixed income securities (cleared through BME Clearing Repo), equity securities and option trades in which the Company acted as the CCP in 2018 and 2017 (the positions held in these financial assets are matched by equivalent positions in financial liabilities - section (b) of this note) are as follows:

	Thousands of euros							
	2018				2017			
	Fixed income securities in CCP (BME Clearing Repo)	Options in CCP	Equity securities in CCP	Total	Fixed income securities in CCP (BME Clearing Repo)	Options in CCP	Equity securities in CCP	Total
January	11,595,731	150,374	1,586,723	13,332,828	14,378,197	168,426	1,767,202	16,313,825

December	10,265,387	382,552	888,550	11,536,489	17,868,540	151,783	914,006	18,934,329

With regard to futures held for trading, since the Company acts simultaneously as buyer and seller, these are presented in the balance sheet at their net amount (Note 4.4.5). Only receivables and payables corresponding to the daily settlements of gains and losses pending settlement at 31 December 2018 and 2017 are recognised in the balance sheet under “Current investments from transactions - Receivables for settlement” and “Current financial liabilities from transactions - Payables for settlement”, respectively. The balances of these items and the total amount of daily settlements of futures settled during 2018 and 2017 are discussed in “Receivables from settlement” below.

b) Receivables for settlement

This item includes the balances receivable for the settlement (next day settlement with each clearing member) of daily options trades in the amount of €157 thousand at 31 December 2018 and €140 thousand at 31 December 2017, and of the daily settlement of gains and losses on futures in the amount of €25,087 thousand and €28,612 thousand at 31 December 2018 and 2017, respectively. The amounts settled in the daily settlement of gains and losses (debtor balance) on futures traded, together with the daily settlement of gains and losses on futures trade pending settlement at 31 December 2018 and 2017 stood at €7,808,749 thousand and €10,847,975 thousand, respectively. The amount settled for daily settlement of gains and losses under assets (debtor balance) matches the amount settled for daily settlement of gains and losses under liabilities (creditor balance) and therefore, neither are recognised with a balancing entry in the income statement (Note 4.4.4).

c) Posting collateral from participants

The maturities and average returns on the assets included under “Posting collateral from participants” in the balance sheet at 31 December 2018 and 2017 are as follows:

	Thousands of euros				Average interest rate
	Up to 1 month	Between 1 and 3 Months	Between 3 and 12 Months	Total	
31 December 2018:					
Current accounts in Banco de España	2,300,677	-	-	2,300,677	-0.40%
	2,300,677	-	-	2,300,677	
31 December 2017:					
Current accounts in Banco de España	3,153,196	-	-	3,153,196	-0.40%
	3,153,196	-	-	3,153,196	

Although, as of 31 December 2018 and 2017, members' collateral is fully posted in the Banco de España current account, in 2018 and 2017 such collateral was also posted in reverse repurchase agreements, with the following movement:

	Thousands of euros
	Reverse repurchase agreements
Balance at 1 January 2017	1,056,688
Purchases	345,316,675
Sales	(346,373,363)
Balance at 31 December 2017	-
Purchases	15,544,190
Sales	(15,544,190)
Balance at 31 December 2018	-

The posting of collateral from members in Reverse repurchase agreements in 2018 generated a negative return amounting to €242 thousand (€5,881 thousand in 2017), debited to "Financial income – Marketable securities and other financial instruments - Other" in the income statement. The negative return passed on to members has been credited to "Financial expenses – Collateral from participants" in the income statement. The posting of collateral from members in the Banco de España current account in 2018, generated penalties charged by Banco de España amounting to €11,080 thousand (€7,516 thousand in 2017), corresponding to the negative interest rate of the deposit facility, which were debited to "Financial expenses – Collateral from participants" in the income statement. These penalties, passed on to members (for the same amount), were credited to "Financial income – Marketable securities and other financial instruments - Other" in the income statement (Note 4.7).

d) Posting cash withheld for settlement

The balance of this account, amounting to €1,535 thousand as of 31 December 2018 (no amount was recognised or this item at 31 December 2017) includes a financial asset corresponding to the posting of amounts of cash payables temporarily controlled or withheld by the Company for the cash differences of the failed instructions pending settlement in which the CCP is involved section b) of this note).

e) Cash receivables for settlement

Cash receivables for settlement of €23 thousand at 31 December 2017 includes the collection right of the Company for the financing provided by BME Clearing to the system for the cash differences of the failed instructions pending settlement in which the CCP is involved (credit balance at 31 December 2018).

b) Current financial liabilities from transactions

The breakdown of this balance sheet heading by classification for measurement purposes, origin, currency and class is as follows:

	Thousands of euros	
	2018	2017
Classification for measurement purposes:		
Financial liabilities held for trading	11,536,489	18,934,329
Accounts payable	2,325,921	3,181,948
	13,862,410	22,116,277
Source and classification for presentation:		
Current financial liabilities from transactions -		
Collateral from participants	2,299,142	3,153,196
Financial instruments in CCP	11,536,489	18,934,329
Payables for settlement	25,244	28,752
Cash payables withheld for settlement	1,535	-
	13,862,410	22,116,277
Currency:		
Euro	13,862,410	22,116,277
Other currencies	-	-
	13,862,410	22,116,277
Nature:		
Derivatives		
Options in CCP	382,552	151,783
Fixed income securities in CCP (BME Clearing Repo)	10,265,387	17,868,540
Equity securities in CCP	888,550	914,006
Other financial liabilities		
Collateral	2,299,142	3,153,196
Payables for settlement of daily options and futures trades	25,244	28,752
Cash payables withheld for settlement	1,535	-
Total financial liabilities	13,862,410	22,116,277

The Directors consider that the carrying amounts of the balances under “Current financial liabilities from transactions” in the balance sheet are equivalent to their fair value.

The residual maturity of “Current financial liabilities from transactions”, with the exception of fixed income securities, equity and options held in CCP, changes daily depending on the market positions held by the owners of these instruments.

9. Nature and extent of risks arising from financial instruments

i. Information on the nature and level of risk of financial instruments

A detailed explanation of the degree of exposure of the Company to the main business risks and how it manages these risks in compliance with Regulation (EU) 648/2012 (hereinafter, "EMIR") and its implementing provisions (Delegated Regulations (EU) 152/2013 and 153/2013) is provided in the Directors' Report contained in these annual accounts.

The main financial risks to which the Company is exposed are discussed below:

a. Exposure to credit risk:

The Company's main financial assets are reverse repurchase agreements and banks deposits (or deposits at central banks), cash balances and trade and other receivables, which represent the Company's maximum exposure to credit risk in relation to financial assets.

The credit risk associated with reverse repurchase agreements, bank deposits and liquid funds is minimal, since the counterparties are banks allocated adequate ratings by international credit rating agencies. Investment risk, as detailed in the Directors' Report included herein, or the risk that the CCP's counterparty in the investment of the CCP's cash margins or capital defaults, is mitigated by executing a highly conservative investment policy in accordance with Article 47 of the EMIR, which places priority on security of the investment at all times over profitability.

The Company operates as the CCP for derivative instruments, equity transactions and public debt repos; therefore, it incurs counterparty risk. It hedges this risk by managing the collateral required of all market participants based on a sophisticated system of measurement and control of open positions that enables it to request additional collateral depending on the day-to-day activity of members in real time, under the terms set out in its Regulation and Circulars, and in prevailing legislation.

The Company does not a significant concentration of credit risk.

b. Exposure to liquidity risk:

The risk that the Company will not have sufficient funds available to meet the payment obligations of a member that has defaulted. In accordance with Article 44 of the EMIR, the Company has a liquidity plan approved by the Board of Directors that sets out the mechanisms to ensure that the CCP has access to adequate financial resources to cover its liquidity needs in any circumstances.

Moreover, to ensure its liquidity and ability to meet the payment obligations arising from its activity, the Company has the cash balances sheet in the balance sheet (Note 10).

c. Exposure to market risk (including interest rate risk, currency risk and other price risk):

As indicated previously, given that the portfolio of financial assets is mainly made up of reverse repurchase agreements (with public debt as the underlying asset), exposure to interest rate risk is minimal as maturities are very short-term and returns adapt quickly to changes in interest rates. Meanwhile, the lack of borrowings or financial liabilities implying a finance charge means the Company is not exposed to risks in interest rates that could erode its margins or require a specific hedging policy.

The Company does not hold financial instruments in any currency other than the euro.

d. Exposure to other market risks:

The main risks and uncertainties faced by the Company in terms of delivering its strategic targets relate to trends in market trading volumes which, in turn, are its key revenue driver.

Experience shows that financial markets are subject to cycles of varying duration and intensity, which have a significant influence on ongoing business. Additionally, as the Company operates in a highly regulated sector, any changes in the regulatory framework could affect the Company's ability to improve on its results.

ii. Quantitative data

a. Credit risk:

The concentration of credit risk is not significant as the Company's exposure is distributed amongst a large number of customers.

The Company had no customer balances subject to impairment adjustments at 31 December 2018 and 2017 (Note 15).

b. Interest rate risk:

Details of the carrying amounts of financial assets grouped by maturity from shortest to longest, as well as the effective interest rates for assets that accrue a determinable effective interest rate, are provided in Notes 8 and 10.

c. Currency risk:

The Company did not have any receivable or payable balances related to transactions in currencies other than the euro at 31 December 2018 and 2017.

10. Cash and cash equivalents

“Cash and cash equivalents” includes demand deposits at banks (recognised under “Cash”) and financial instruments that are convertible to cash and have a maturity of three months or less from the date of acquisition, provided that there is no significant risk of changes in value and that they form part of the Company’s usual cash management policy. The latter assets are included under “Cash equivalents”:

	Thousands of euros	
	2018	2017
Classification:		
Cash-		
Current accounts	20,767	32,522
	20,767	32,522
Cash equivalents:		
Reverse repurchase agreements	14,999	1,035
	14,999	1,035
Less - Impairment losses	-	-
Net balance	35,766	33,557

The carrying amount of these assets is similar to their fair value.

The maturities and average returns on the assets included under “Cash and cash equivalents” in the balance sheet, excluding cash, at year-end 2018 and 2017, and whose counterparty was Bankinter, S.A. at 31 December 2018 and 2017, are shown below:

	Thousands of euros	Object interest rate
	Up to 1 month	
31 December 2018:		
Reverse repurchase agreements	14,999	-0.40%
	14,999	
31 December 2017:		
Reverse repurchase agreements	1,035	0.00%
	1,035	

Movements in "Reverse repurchase agreements" in 2018 and 2017 were as follows:

	Thousands of euros
Balances at 1 January 2017	5,401
Purchases	63,499
Sales	(67,865)
Balances at 31 December 2017	1,035
Purchases	182,690
Sales	(168,726)
Balances at 31 December 2018	14,999

No impairment losses were recognised for these financial assets in 2018 and 2017.

The negative returns generated on cash and cash equivalents in 2018 amounted to €3 thousand (positive returns of €2 thousand in 2017), recognised under "Financial income – Marketable securities and other financial instruments - Other" in the income statement.

Likewise, in 2018, the penalty for the negative interest rate charged to the Company for balances held in the current account amounted to €15 thousand and are recognised under "Financial expenses - Third-party borrowings" (no amount was recognised for this item in 2017).

11. Equity

The breakdown of the various items included in equity and changes in 2018 and 2017 were as follows:

	Thousands of euros							
	Capital	Legal and statutory reserves	Other reserves	Other equity holder contributions	Profit/(loss) for the year	Interim dividend	Total (*)	Final dividend
Balances at 31 December 2016	18,030	3,606	20,887	1,200	10,768	(9,654)	44,837	-
Distribution of 2016 profit	-	-	-	-	(10,768)	9,654	(1,114)	(1,114)
Profit/(loss) for 2017	-	-	-	-	11,751	-	11,751	-
Interim dividend from profit in 2017 (Note 3)	-	-	-	-	-	(10,601)	(10,601)	-
Actuarial gains and losses (Note 12)	-	-	(18)	-	-	-	(18)	-
Other equity holder contributions (Note 14)	-	-	-	237	-	-	237	-
Balances at 31 December 2017	18,030	3,606	20,869	1,437	11,751	(10,601)	45,092	-
Distribution of 2017 profit	-	-	-	-	(11,751)	10,601	(1,150)	(1,150)
Profit/(loss) for 2018	-	-	-	-	11,114	-	11,114	-
Interim dividend from profit in 2018 (Note 3)	-	-	-	-	-	(9,607)	(9,607)	-
Actuarial gains and losses (Note 12)	-	-	26	-	-	-	26	-
Other equity holder contributions (Note 14)	-	-	-	169	-	-	169	-
Balances at 31 December 2018	18,030	3,606	20,895	1,606	11,114	(9,607)	45,644	-

(*) In accordance with article 35 of Regulation 153/2013 (EU) with regard to regulatory technical standards on requirements for central counterparties, the dedicated own resources included in "Equity" at 31 December 2018 and amount to €5,500 thousand (€6,000 thousand at 31 December 2017) as set out in the Company's respective Dedicated Own Resources Circulars.

Registered capital

At 31 December 2018 and 2017, the Company's share capital amounted to €18,030 thousand and consisted of 3,000,000 fully subscribed and paid in ordinary registered shares with a par value of €6.01 each. All shares representing share capital have the same rights and are not listed on the stock exchange.

The sole shareholder of the Company at 31 December 2018 and 2017 was Bolsas y Mercados Españoles Sociedad Holding de Mercados y Sistemas Financieros, S.A. The Company is, therefore, subject to the regime governing single member companies. It has disclosed its single member status to the Companies Registry. Under this regime, the Company must, inter alia, disclose agreements with its Sole Shareholder in the notes to the financial statement. In this respect, in early 2014, the Company entered into an agreement with BME to oversee the handling of personal data pursuant to the startup of the whistleblowing channel of the Crime Prevention System. In 2016 the Company also signed an agreement with BME to provide management and administration support services for the Company (Note 15), and a contract for personal data processing in relation to human resource management.

Article 16 of the EMIR Regulation, along with its implementing Delegated Regulation (EU) 152/2013 and article 35 of Delegated Regulation (EU) 153/2013, sets out minimum capital requirements (i.e. capital plus retained earnings and reserves) of a CCP. These requirements establish a initial minimum capital requirement, permanent and available, of €7,500 thousand and requirements based on gross annual operating costs, average revenue of the last three years, the calculation of credit, counterparty and market risks not covered by dedicated resources and a 10% safety margin. Article 35 of Delegated Regulation (EU) 153/2013 also requires the CCP to keep at least 25% of dedicated own resources for use in applying the default waterfall.

At 31 December 2018 and 2017, the Company comfortably complied with the aforementioned requirements.

Legal reserve

Under the consolidated text of the Corporate Enterprises Act, an amount equal to 10% of the profit for the year must be earmarked for the legal reserve until such reserve represents at least 20% of share capital.

The legal reserve can be used to increase capital provided that the remaining reserve balance does not fall below 10% of the increased share capital amount. Except as mentioned above, until the legal reserve exceeds 20% of share capital, it can only be used to offset losses, provided that sufficient other reserves are not available for this purpose.

At year-end 2018 and 2017, this reserve was fully provisioned.

Other reserves and other equity holder contributions

Other reserves and other equity holder contributions are unrestricted.

12. Non-current provisions

The breakdown of this item on the statement of financial position at 31 December 2018 and 2017 and the main changes during those years are as follows:

	Thousands of euros			
	Pension obligations (Note 4.11)		Other long-term employee benefits (Note 4.9)	Total
	Retirement bonuses	Health benefits ⁽¹⁾		
Balances at 1 January 2017	77	31	-	108
Net provision recognised in income (Note 13)	41	8	-	49
Net provision (reversal) with a charge (credit) to Equity (Note 11)	19	(1)	-	18
Transfers (Note 17)	4	50	-	54
Amounts used	(18)	-	-	(18)
Balances at 31 December 2017	123	88	-	211
Net provision recognised in income (Note 13)	43	8	175	226
Net provision (reversal) with a charge (credit) to Equity (Note 11)	(24)	(2)	-	(26)
Transfers (Note 17)	-	-	-	-
Amounts used	(45)	-	(23)	(68)
Balances at 31 December 2018	97	94	152	343

(1) Net provisions recognised in income for provision of health benefit cost in 2018 and 2017 the amounted to €6 thousand in both years (Note 14) and interest cost amounting to €2 thousand in both years.

The incentive-based redundancy plan approved by the Board of Directors in 2018, is recognised under the heading "Other long-term employee benefits". It is restricted to a reduced group of employees in the technology area fulfilling certain requirements covering age and length of service within the Company.

Long-term employee benefit obligations

The Company measured the present value of pension obligations (Note 4.11) using the following criteria:

- Calculation method: "Projected credit unit", this considers each year of service as the generator of an additional unit of a right to remuneration, with each unit being valued separately.

- Actuarial assumptions used: unbiased and mutually compatible. In general, the most important actuarial assumptions used in the calculations are as follows:

	Retirement bonuses		Health benefits	
	2018	2017	2018	2017
Discount rate	1.64%	1.52%	1.89%	1.83%
Mortality tables	PER2000-P	PER2000-P	PER2000-P	PER2000-P
Retirement age	65 years	65 years	65 years	65 years
Expected return on plan assets	1.64%	1.52%	-	-
Benefit growth rate	1.0%	1.0%	3.5%	3.5%

- Discount rate: The Company determined the discount rate by reference to market yields at the end of the reporting period on high quality corporate bonds and debentures of a currency and term consistent with the currency and term of the post-employment benefit obligations. Specifically, the Company used the market yields of the Markit iBoxx € Corporates AA index.

Long-term employee benefit obligations (retirement bonuses)

The amounts recognised in the income statement for long-term defined benefit obligations in respect of retirement bonuses were as follows:

Long-term employee benefit obligations – Retirement bonuses	Thousands of euros	
	2018	2017
Current service cost (Note 14)	40	38
Interest costs	8	8
Expected return on insurance policies	(6)	(6)
Past service cost (Note 14)	1	1
	43	41

The change in the fair value of the long-term defined benefit obligations is as follows:

Long-term employee benefit obligations – Retirement bonuses	Thousands of euros	
	2018	2017
Present value of obligations at 1 January	536	453
Current service cost	40	38
Interest costs	8	8
Benefits paid	(24)	-
Transfers	1	41
Actuarial (gains)/losses	(25)	(4)
Present value of obligations at 31 December	536	536

The change in the fair value of insurance policies linked to long-term defined benefit obligations was as follows:

Long-term employee benefit obligations – Retirement bonuses	Thousands of euros	
	2018	2017
Fair value of insurance policies linked to pensions at 1 January	394	356
Expected return on insurance policies	6	6
Actuarial gains/(losses)	(1)	(23)
Transfers	1	37
Benefits paid and others	(11)	-
Premiums paid	32	18
Fair value of insurance policies linked to pensions at 31 December	421	394

The situation of long-term defined benefit obligations at 31 December 2018 and 2017 is as follows:

	Thousands of euros	
	2018	2017
Present value of obligations	536	536
Less-		
Fair value of plan assets	(421)	(394)
Unrecognised past service cost	(18)	(19)
Liability in the balance sheet	97	123

13. Tax matters

a) Consolidated tax group

The Company files consolidated tax returns. Under prevailing tax legislation, the Consolidated Tax Group includes Bolsas y Mercados Españoles as parent company plus all the consolidated entities as subsidiaries, with the exception of Sociedad Rectora de la Bolsa de Valores de Bilbao, S.A., Sociedad Unipersonal, Difubolsa - Serviços de Difusão e Informação de Bolsa, S.A., Infobolsa Deutschland, GmbH, BME Soporte Local Colombia S.A.S., Regis-TR, S.A. and LATAM Exchanges Data, Inc. On 1 January 2017 Bolsas y Mercados Españoles Inttech, S.A.U. and Open Finance, S.L., and since its incorporation (12 May 2017) BME Regulatory Services, S.A.U. were included in the Consolidated Tax Group.

At a meeting on 17 December 2014, the Board of Directors of Bolsas y Mercados Españoles unanimously agreed to adopt the Special Companies Group System for Value-Added Tax, exercising the option stipulated in Article 163 sexies, Five of Law 37/1992, as of 1 January 2015. Subsequently, on 29 December 2014, Bolsas y Mercados Españoles applied to pay tax under the Special System, of which it is the parent company with the following as subsidiaries: the Company, Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.U., MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A.U., Sociedad de Bolsas, S.A., Bolsas y Mercados Españoles Sistemas de Negociación, S.A., and Bolsas y Mercados Españoles Market Data, S.A.

With effect from 1 January 2017, the following companies were incorporated into the aforementioned Special System: Sociedad Rectora de la Bolsa de Valores de Madrid, S.A.U., Sociedad Rectora de la Bolsa de Valores de Barcelona, S.A.U., Sociedad Rectora de la Bolsa de Valores de Valencia, S.A.U., Bolsas y Mercados Españoles Renta Fija, S.A.U. and BME Post Trade Services, S.A.U.

Under the Special System, the Company recognised credit balance with Bolsas y Mercados for the settlement of VAT under "Current payables to Group companies and associates", amounting to €72 thousand at 31 December 2018 (€52 thousand at 31 December 2017) (Note 17).

b) Balances with public bodies

Receivables from and payable to public bodies at 31 December 2018 and 2017 are as follows:

	Thousands of euros	
	2018	2017
Non-current assets:		
Deferred tax assets	226	215
	226	215
Current assets:		
Current tax assets	436	153
	436	153
Current liabilities:		
Trade and other payables – Other payables-		
Social Security, payables	85	81
Taxation authorities, withholding income tax	157	157
	242	238

c) Reconciliation of accounting profit to taxable income

The reconciliation of accounting profit to taxable income is as follows:

	Thousands of euros	
	2018	2017
Accounting profit before tax	14,442	15,495
Permanent differences:		
Other non-deductible costs	3	12
Temporary differences:		
Arising in the year-		
Long-term employee benefit obligations (Notes 12 and 14)	372	286
Arising in prior years-		
Long-term employee benefit obligations	(323)	(180)
Other	(2)	(257)
Taxable profit	14,492	15,356

d) Taxes recognised in equity

No taxes were recognised in equity in 2018 and 2017.

e) Reconciliation of taxable income to income tax expense

The reconciliation between taxable income and income tax expense in 2018 and 2017 is as follows:

	Thousands of euros	
	2018	2017
Taxable profit	14,492	15,356
At tax rate of 25%	3,623	3,839
Impact of temporary differences	(12)	38
Tax credits-		
Other	-	(4)
Positive adjustments to corporate income tax	(283)	(129)
Total tax expense recognised in the income statement	3,328	3,744

The tax payable attributable to the Company, amounting to €3,623 thousand (€3,835 thousand at 31 December 2017), net of payments on account made by the Company in 2018 of €3,073 thousand (€3,348 thousand in 2017) is recognised under "Current payables to Group companies and associates" for €550 thousand (€487 thousand in 2017) (Note 17).

The positive adjustment to gains in 2018 reflects positive adjustments arising from deductions for investment in Research and Development in 2015 (positive adjustment to gains in 2017 arising from deductions for investment in Research and Development in 2014).

f) Income tax expense

The breakdown of income tax expense is as follows:

	Thousands of euros	
	2018	2017
Current tax:		
From continuing transactions	3,623	3,835
	3,623	3,835
Deferred tax:		
From continuing transactions	(295)	(91)
	(295)	(91)
Total tax expense	3,328	3,744

g) Recognised deferred tax assets

The breakdown of recognised deferred tax assets and liabilities in 2018 and 2017 is as follows:

	Thousands of euros	
	2018	2017
Temporary differences:		
Long-term employee benefit obligations	240	228
Other	(14)	(13)
Total deferred tax assets	226	215

The deferred tax assets indicated above were recognised in the balance sheet as the Board of Directors considered that, based on the best estimate of the Company's future earnings, it is probable that these assets will be recovered.

At 31 December 2018 and 2017, there were no other tax losses or deferred tax assets that had not been recognised.

h) Years open for inspection and tax audits

Under current legislation, taxes cannot be deemed to have been definitively settled until the tax returns filed have been reviewed by the tax authorities or until the four-year statute of limitations has expired. At 31 December 2018, the Company had all transactions carried out over the last four years open for review by the tax authorities in respect of the applicable taxes.

Due to the different possible interpretations of tax regulations applicable to the Company's transactions, any tax audits carried out by the tax authorities for the years in question could result in contingent tax liabilities, the amount of which cannot be objectively quantified at present. Nevertheless, the Company's Directors consider

the possibility of significant contingent liabilities arising from future inspections to be remote and, in any event, that the resulting tax liability would not have a material impact on the Company's annual accounts.

14. Staff costs

The breakdown of this income statement heading is as follows:

	Thousands of euros	
	2018	2017
Wages, salaries and similar expenses (*)	4,921	4,542
Social welfare expenses	876	795
Provisions and other staff costs	311	280
	6,108	5,617

(*) The balance of this account includes provisions for employee benefits made in 2018 and 2017 of €47 thousand and €29 thousand, respectively (Note 12), and provisions for incentive-based redundancies made in 2018 for the amount of 175 miles de euros (Note 12).

"Wages, salaries and similar expenses" included €169 thousand in 2018 (€237 thousand in 2017) relating to the portion of estimated fair value of the equity instruments granted to employees under the "Pluri-Annual Share-Based Variable Remuneration Plan" and "Medium-Term Share-Based Variable Remuneration Plan" recognised in profit and loss in the specific year the beneficiaries provided their services to the Company with a debit to "Other equity owner contributions" (Notes 4.13, 11 and 13).

At 31 December 2018 wages and salaries payable to employees amounted to €553 thousand (€547 thousand at 31 December 2017), recognised under "Trade and other payables – Other payables" on the liabilities side of the balance sheet at that date.

At 31 December 2018 and 2017, advances and loans had been granted to Company employees for €85 thousand and €64 thousand, respectively, recognised under "Trade and other receivables – Other receivables" in the balance sheet.

The average number of employees in 2018 and 2017 by professional category was as follows:

	Employees	
	2018	2017
Middle management	7	6
Specialist technicians	35	36
Auxiliary staff	26	23
	68	65

The breakdown by gender at 31 December 2018 and 2017 by professional category was as follows:

	Employees			
	2018		2017	
	Men	Women	Men	Women
Middle management	6	1	5	1
Specialist technicians	16	18	19	18
Auxiliary staff	19	7	19	8
	41	26	43	27

In 2018 and 2017, the Company made donations towards job placement and job creation activities for disabled persons, in accordance with RD 27/2000, 14 January. Special alternative measures were taken to comply with the 2% level established by Law 13/1982, 7 April, on the Social Inclusion of Disabled Persons, which states that the number of workers with a disability equal to or greater than 33% must not be lower than 2% of the total workforce.

15. Other operating costs

External services

The breakdown, by item, of this income statement heading 31 December 2018 and 2017 was as follows:

Category	Thousands of euros	
	2018	2017
Lease of offices and installations	290	275
Information technology equipment and computer software	684	587
Communications network	96	102
Travel, marketing and promotion	204	187
Independent professional services	1,613	1,646
Information services	217	173
Power and utilities	82	79
Security, cleaning and maintenance	203	186
Other expenses (Note 19):	1,124	1,006
	4,513	4,241

In 2018 and 2017, "Independent professional services" includes, inter alia, expenses relating to management and administration services provided to the Company by Bolsas y Mercados Españoles (Notes 11 and 17).

The "Other expenses" heading in the above table for 2018 and 2017, €281 thousand and €274 thousand, respectively, also includes supervision fees charged to the Company by the CNMV pursuant to Act 16/2014, of 30 September, regulating CNMV fees, which came into effect on 1 January 2015.

Amounts payable for external services at 31 December 2018 and 2017, including outstanding amounts owed to Bolsas y Mercados Españoles Group companies (Note 17), are recognised under "Trade and other payables" in "Payables" on the liabilities side of the balance sheet.

Fees paid to PricewaterhouseCoopers Auditores, S.L. for the audit of the financial statements in 2018 and 2017 amounted to €22 thousand, in both years. No fees were incurred in 2018 and 2017 by other companies that use the PricewaterhouseCoopers trademark as a result of other services provided.

Losses, impairment and changes in trade provisions

This item includes valuation allowances for trade and other receivables recognised in the year as a result of the impairment testing of these assets (Note 4.4).

There were no balances of trade and other receivables past-due at 31 December 2018 and 2017.

No provisions were recognised in 2018 and 2017 for impairment losses on assets in the balances of trade and other receivables on the asset side of the balance sheet.

Information on deferred payments to suppliers in commercial transactions

In accordance with the Second Final Provision of Law 31/2014, 3 December, under which the Corporate Enterprises Act is amended to improve corporate governance, which amends the Third Additional Provision of Law 15/2010, 5 July, amending Law 3/2004, 29 December, under which measures against late payments in commercial transactions are established, and considering the Single Additional Provision of the Ruling on 29 January 2016, of the Spanish Accounting and Audit Institute (ICAC) in information to be included in financial statements in relation to the average supplier payment period in commercial transactions, for the purposes of complying with the information obligation established, information on the average supplier payment period in 2018 and 2017 is set out below:

	2018	2017
	Days	Days
Average supplier payment period	48.75	46.52
Ratio of transactions paid	49.26	46.54
Ratio of transactions pending payment	17.03	45.83
	Thousands of euros	Thousands of euros
Total payments made	1,959	2,446
Total payments pending	31	56

Information on leases

Future minimum rentals payable by the Company under operating leases on buildings is as follows:

	Thousands of Euros (*)
Within one year	281
Between 1 and 5 years	-
More than 5 years	-

(*) Amounts not updated for CPI.

Most of the minimum future payments within one year relate to a building under an operating lease, used by the Company as its headquarters. The lease expires in 2019, with automatic annual renewal.

In addition, it should be noted that these contracts do not contain contingent fees, restrictions or purchase options, but do contain annual review clauses for the contract validity periods, using the Consumer Price Index ("CPI") as the reference.

16. Revenue and variable direct costs of transactions

a) Revenue

The breakdown, by item, of this heading in the 2018 and 2017 income statements, was as follows:

	Thousands of euros	
	2018	2017
Access charges for infrastructures and other facilities	2,412	2,530
Clearing and central counterparty-		
Equity	9,278	10,434
Fixed Income	610	793
Financial derivatives	8,333	8,427
Other income from clearing and central counterparty	8,337	7,971
IT and Consulting	347	-
Other sales and rendering of services	286	-
	29,603	30,155

The Company generates virtually all of its revenue in Spain.

Outstanding receivables at year-end 2018 and 2017 for all items are recognised under "Trade and trade receivables" on the assets side of the balance sheet at 31 December 2018 and 2017 in "Trade receivables from members and participants", "Trade receivables from Group companies and associates" (Note 17) and "Other receivables".

b) Variable direct cost of transactions

“Variable direct cost of transactions” at 31 December 2018 and 2017 includes the variable costs directly attributed to the company's services provided. Specifically, this heading includes variable costs of settlement services (equity segment since the first phase of the Reform entered into force and equity since the second phase of the Reform entered into force) that Iberclear invoiced to the Company, which totalled €1,621 thousand in 2018 (€1,535 thousand in 2017) (Note 17); the variable costs that the stock exchange governing companies and BME Sistemas de Negociación, S.A. invoiced to the Company for transactions involving securities listed for trading in the official secondary markets and multilateral trading systems and of which the Company was informed for the clearing thereof, in accordance with the agreement signed in 4Q 2016, amounting to €443 thousand in 2018 (€511 thousand in 2017) (Note 17); and the variable costs that MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A. - Sociedad Unipersonal invoiced to the Company for the nominal amount traded on financial derivatives, which the Company was informed for the clearing thereof, in accordance with the agreement signed in 2017, amounting to €1,000 thousand in 2018 (€1,048 thousand in 2017) (Note 17) and agent fees for the OTC segment on interest rates amounting to €10 thousand in 2018 (€10 thousand in 2017).

The variable direct costs of transactions pending payment at 31 December 2018 and 2017, including outstanding amounts owed to Bolsas y Mercados Españoles Group companies (Note 17), are recognised under the heading, “Trade and other payables – Other payables” in the balance sheet.

17. Balances with related parties

At 31 December 2018 and 2017, the Company had the following balances with Bolsas y Mercados Españoles Group companies (Note 1):

	Thousands of euros	
	Bolsas y Mercados Españoles Group	
	2018	2017
Assets:		
Non-current investments (Note 7)	34	30
Trade and other receivables		
Receivables from Group companies and associates	989	258
Current investments in Group companies and associates (*)	49	66
	1,072	354
Liabilities:		
Current payables to Group companies and associates (Note 13)	622	539
Trade and other payables-		
Trade payables (Note 15)	1,033	683
	1,655	1,222
Expenses:		
Other operating costs		
External services (Note 15)	2,743	2,464
Taxes other than income tax	28	27
	2,771	2,491
Revenue:		
Revenue -		
Access charges for infrastructures and other facilities (Note 16)	1,100	1,100
IT and Consulting (Note 16)	347	-
Other sales and rendering of services (Note 16)	286	-
Variable direct cost of transactions (Note 16)	(3,064)	(3,094)
	(1,331)	(1,994)

(*) Mainly includes the collection right with Group companies for transfers of retirement bonus and healthcare commitments in 2017 (Note 12).

18. Other additional financial information

	Thousands of euros	
	2018	2017
Collateral from market:		
Received as pledges and securities as collateral	1,239,104	1,919,611
Total (*)	1,239,104	1,919,611

(*) Off-balance sheet items not recognised in equity.

Includes collateral received in addition to deposited cash collateral (Note 8) executed by members as collateral for their open positions in their respective segments.

19. Remuneration and other benefits paid to members of the Board of Directors and senior management

Remuneration paid during the year to former and current members of the Board of Directors and the Company's senior management (including within this category the middle manager who sits on the Board of Directors), by item, was as follows:

Financial Year 2018

	Thousands of euros				Equity-settled share-based payments (Maximum number of theoretical shares)						
					2014-2019 Plan			2017-2020 Plan	2018-2023 Plan		
	Salaries	Per diems ⁽²⁾	Other Items ⁽⁴⁾	Insurance premiums	First three-year period	Second three-year period ⁽⁴⁾	Third three-year period	One-off three-year period	First three-year period	Second three-year period	Third three-year period
Board of Directors ⁽¹⁾	-	188 ⁽³⁾	-	-	-	-	-	-	-	-	-
Senior Management ⁽¹⁾	338	18	37	-	2,496	2,496	2,496	2,496	2,550	-	-

(1) The member of the Management who is part of Senior Management, is also a member of the Board of Directors.

(2) This amount includes per diems for attendance at the Board of Directors and Committee meetings, which are recognised under "Other operating costs – External services - Other expenses" in the income statement for 2018 (Note 15).

(3) This amount includes per diems for attendance at the Board of Directors and Committee meetings received by the Secretary of the Board of Directors and Committees, who does not have Company Director status.

(4) The second three-year period of the 2014-2019 Plan expired on 31 December 2017. The Appointments and Remuneration Committee, in its 28 May 2018 meeting, validated the coefficients applicable to the theoretical units convertible into shares assigned to each beneficiary of the second three-year period of the 2014-2019 Plan, at 1.5 in the case of the Efficiency Ratio and 0 in the case of Total Shareholder Return (TSR), and established the number of shares deliverable to the Company's Senior Management at 1,248 shares, worth €37 thousand. In June 2018, the Plan was settled through the net delivery, once the withholdings set forth in prevailing tax legislation had been applied, of 727 shares (Note 4.13).

Financial Year 2017

	Thousands of euros				Equity-settled share-based payments (Maximum number of theoretical shares)						
					2011-2016 Plan			2014-2019 Plan			2017-2020 Plan
	Salaries	Per diems ⁽²⁾	Other Items ⁽⁴⁾	Insurance premiums	First three-year period	Second three-year period	Third three-year period	First Three-year period ⁽⁴⁾	Second three-year period	Third three-year period	One-off three-year period
Board of Directors ⁽¹⁾	-	204 ⁽³⁾	-	-	-	-	-	-	-	-	-
Senior Management ⁽¹⁾	339	17	39	-	2,100	2,211	2,196	2,496	2,496	2,496	2,496

(1) The member of the Management who is part of Senior Management, is also a member of the Board of Directors.

(2) This amount includes per diems for attendance at the Board of Directors and Committee meetings, which are recognised under "Other operating costs – External services - Other expenses" in the income statement for 2017 (Note 15).

(3) This amount includes per diems for attendance at the Board of Directors and Committee meetings received by the Secretary of the Board of Directors and Committees, who does not have Company Director status.

(4) On 31 December 2016, the first three-year period of the 2014-2019 Plan expired. BME's Appointments and Remuneration Committee, at its 24 May 2017 meeting, validated the coefficients applicable to the theoretical units convertible into shares allocated to each beneficiary of the second three-year period of the 2014-2019 Plan at 1.5 in the case of the efficiency ratio and 0 in the case of total shareholder return (TSR), and established the number of shares deliverable to the Company's senior management at 1,248 shares, worth €39 thousand. In June 2017, the Plan was settled through the net delivery, once the withholdings set forth in prevailing tax legislation had been applied, of 729 shares (Note 4.13).

At 31 December 2018 and 2017, the Company had not extended any loans or advances and had not assumed any collateral or pension or life insurance obligations vis-à-vis current or former members of the Board of Directors or the Company's senior management other than those indicated above.

In compliance with Additional Provision Twenty-six of Organic Law 3/2007, dated 22 March, regarding effective gender equality, the Board of Directors comprises six members, of which are four men (66.67%) and two are women (33.33%).

Information required under Article 229 of the consolidated text of the Corporate Enterprises Act

In accordance with Article 229 of the revised text of the Corporate Enterprise Act, in order to enhance the transparency of corporations, the Company's Directors explicitly state that they have not incurred in the conflicts of interest set forth in Article 229.1 of the consolidated text of the Corporate Enterprises Act, and they are certain that none of the situations mentioned therein apply to the persons related to them.

20. Financial structure

As indicated in Note 1, the Company belongs to the Bolsas y Mercados Españoles Group. Annexe 1 of the Consolidated Financial Statement of Grupo Bolsas y Mercados Españoles details the companies that are directly held by Bolsas y Mercados Españoles, the parent company of the Group, and the main companies in which it has indirect interests.

21. Events after the reporting period

At the date of authorisation for issue of these financial statements, no significant events have occurred that have not been disclosed herein.

BME Clearing, S.A. - Sociedad Unipersonal

Directors' Report for the year ended 31 December 2018

1. Business performance and situation of the Company

The Company is a central counterparty duly authorised by the Spanish Securities Commission (CNMV) pursuant to the Securities Market Act and Regulation (EU) 648/2012 (EMIR).

The Company provides clearing services as a central counterparty for various financial instruments, grouped into the following segments:

- financial derivatives
- energy derivatives
- OTC interest rate derivatives
- trades involving fixed-income securities
- equity spot trades

A total of 43,502,218 contracts for instruments from the group of contracts with non-financial underlying assets (derivative financial instruments) were cleared in 2018, a decrease of 2.4% from the year before. The breakdown is as follows:

	Jan-Dec 2018 (255 days)	Jan-Dec 2017 (255 days)	Position Open
Equity options	20,237,873	20,316,354	6,155,926
IBEX 35 options	4,183,154	4,303,701	745,683
Equity futures	10,703,192	11,671,215	1,196,247
IBEX 35 futures	6,342,478	6,268,290	87,100
Mini + Micro IBEX 35 futures	1,490,237	1,618,857	6,968
IBEX 35 Div Impact futures	70,725	43,372	35,465
Equity dividend futures	471,814	347,435	78,575
Sector Futures	2,745	7,753	-
	43,502,218	44,576,977	8,305,964

Open interest at 31 December 2018, comprised 8.3 million contracts, 3.0% up on year-end 2017.

The volume cleared for the energy contract group in 2018 amounted to 13,776,521 MWh, broken down as follows:

	Jan-Dec 2018 (255 days)	Jan-Dec 2017 (255 days)	Change	Open Position
Electricity Contracts	12,343,048	17,930,085	-31.2%	5,464,016
Natural Gas Contracts	1,433,473	-	-	1,020,223
	13,776,521	17,930,085	-23.2%	6,484,239

Open interest at year-end 2018 comprised 6.5 million MWh, 19.0% down year-on-year.

The cash value of the Company's business as central counterparty for fixed-income securities trading stood at €155,637 million, relating to 2,145 buy/sell-back public debt trades amongst members. These figures represented decreases of 47.3% and 56.4%, respectively, from the year before.

In equity clearing, 88.6 million trades were cleared, including buying and selling, with a cash volume of €1,135,729 million.

2. Financial performance

The Company reported net profit of €11,114 thousand for 2018, compared to €11,751 thousand in 2017, a fall of 5.4%.

In 2018, revenue fell 1.8% to €29,603 thousand (from €30,155 thousand in 2017), broken down as follows:

	Thousands of euros	
	2018	2017
Access charges for infrastructures and other facilities	2,412	2,530
Clearing, settlement and CCP-		
Equity	9,278	10,434
Fixed Income	610	793
Financial derivatives	8,333	8,427
Other income from clearing and central counterparty	8,337	7,971
Other sales and services	286	-
IT and Consulting	347	-
	29,603	30,155

"Direct variable costs from transactions" also includes variable costs directly attributed to the provision of services, mainly settlement costs and costs that depend on volumes in the equity and financial derivatives segments.

Operating costs stood at €10,623 thousand, 7.7% up on the previous year (9,868 in 2017).

The Company's operating profit was down 7.0% on 2017 (€14,531 thousand in 2018 vs. €15,625 thousand in 2017).

As a CCP, the Company guarantees the completion of all contracts and positioned entered in the system. Based on the open interest positions of each clearing member, the Company makes a daily calculation of the margins these members must post to comply with their obligations. The cash value of the collateral received in this

connection at 31 December 2018 stood at €2,299,142 thousand. This collateral is deposited in the Company's accounts in the Eurosystem-Banco de España. In addition, the Company receives securities as collateral (at 31 December 2018 received securities were worth €1,239,104 thousand).

The Company's own cash, which at 31 December 2018 amounted to €14,999 thousand, is invested in public debt repos.

3. Events after the reporting period

No events have occurred since the end of the reporting period with a material impact on the 2018 annual accounts.

4. Main business risks and risk management in accordance with the EMIR

Following is a detailed explanation of the degree of exposure of the Company to the main risks and how it manages these risks in compliance with Regulation (EU) 648/2012 (hereinafter, "EMIR") and its implementing provisions (Delegated Regulations (EU) 152/2013 and 153/2013).

The Company has a risk management framework comprising policies, procedures and risk management systems that enables it to identify, measure and control the risks to which it is, or could be, exposed. In addition, in accordance with Article 26 of the EMIR, it has a Chief Risk Officer, who applies the risk management framework, including the policies and procedures established in this respect by the Board of Directors.

All risks are first identified by the Chief Risk Officer and Company's management, which periodically review risk management, especially with respect daily operations.

Issues related to changes in the risk model, default procedures, and the requirements for accepting members pursuant to Article 28 of the EMIR are handled by the Risk Committee, which advises the CCP's Board of Directors on related matters. The Risk Committee comprises nine members appointed by the Board of Directors as per the criteria provided for in the EMIR: two independent members, four representatives of clearing members and three representatives of clearing member clients.

As per Article 7 of the Commission Delegated Regulation 153/2013, the CCP's Board of Directors is responsible for the establishment and oversight of the risk management function, and senior management for ensuring that sufficient resources are devoted to risk management and being actively involved in the risk control process.

The risks identified and managed by the Company, in accordance with Article 27 of the EMIR, are as follows:

- Market, depository and settlement platform risk: risk of a participant's performance, a malfunction in the depositories (IBERCLEAR, CLEARSTREAM, EUROCLEAR) or in the connection with the markets (MEFF, AIAF, SIBE), or in the TARGET2 settlement platform affecting all the CCP's participants.

The Company has an agreement with each market, one with Banco de España and one with IBERCLEAR, and a framework agreement with CLEARSTREAM and another one with EUROCLEAR. These agreements regulate the obligations of each party, with well-defined lines of responsibility, and procedures for coordinating risk management and default. These entities work together to resolve incidents, and continuity mechanisms are set forth in the aforementioned agreements which are triggered if communications links are severed.

- Legal risk: risk of the Spanish Securities Market Act, BME CLEARING's Rule Book, insolvency laws or other legislation regarding cross-border collateral (collateral deposited in the CCP's account in CLEARSTREAM and EUROCLEAR) being applied unexpectedly due to insolvency, which would hinder executing margins or positions. The legal risks are analysed by the Legal Advisory Department, which proposes solutions to mitigate the risk or to deal with the consequences of any defaults.
- Credit risk: risk of default by a clearing member, which is mitigated almost completely with the margins posted with the CCP, which are calculated and required in accordance with Articles 41, 42, 43 and 45 of the EMIR.

The Company operates as the CCP for derivative instruments, equity transactions and public debt repos; therefore, it incurs counterparty risk. It hedges this risk by managing the collateral required of all market participants based on a sophisticated system of measurement and control of open positions that enables it to request additional collateral depending on the day-to-day activity of members in real time, under the terms set out in its Regulation and Circulars, and in prevailing legislation.

To control risk deriving from its positions in financial assets and exposure to counterparties, the Company continually and efficiently monitors CCP concentration risk at different levels:

- At an aggregate level;
- At clearing house member level;
- At the level of each account open at the CCP;
- In each issuer; and
- In each country.

In addition to the characteristics of the assets, the Company also takes into account the risks associated with them, including volatility, duration, illiquidity, non-linear price characteristics, *jump-to-default* and *wrong-way-risk*, the latter two of which are closely related to credit or counterparty risk.

With regard to counterparty risk related specifically to non-compliance by members, the Company calculates the amount of the default fund every month. This amount is calculated to cover the average risk in a stress test situation calculated for the two members with the greatest exposure to the risk, and increasing this by 10% as of 1 March 2019.

Counterparty risk not covered by the CCP's specific financial resources (i.e. margins requested from its members, the default fund and own dedicated resources) is also analysed. Non-covered counterparty risk is defined as the expected loss deriving from default by the counterparty as a result of insufficient accredited collateral (specific financial resources) that could arise due to one-off market events that trigger a severe risk of default by clearing members.

The margin calculation model developed by the Company offers a coverage level that is appropriate for stress conditions, in alignment with the high confidence level required under EMIR regulations, which in turn further strengthens the Stress methodology applied under other specific requirements of EMIR. For extreme conditions that go beyond the assumptions of these confidence levels, the CCP supplements its monitoring of coverage with an analysis of sensitivity scenarios.

The Company has procedures in place to recognise changes in market conditions, including an increase in volatility or a reduction in the liquidity of the financial instruments cleared, with a view to quickly adapting the calculation of its margin requirements so as to adequately reflect the new market conditions.

The Company also performs daily back tests for each account with an open position in order to evaluate the coverage of its margins by carrying out a comparison, *a posteriori*, of the results observed (maximum losses recorded within a determined close-out period) with the forecast results in terms of required initial margins.

Additionally, to assess positions acquired temporarily as collateral through members, the Company applies a prudential haircut.

The Company applies haircuts for the following market risks:

- Interest rate risk
 - Currency risk
 - Credit spread risk (risk premium)
 - Price fluctuation risk,
 - Concentration risk,
- Liquidity risk: risk that the CCP will not have sufficient funds available to meet the payment obligations of a member that has defaulted. In accordance with Article 44 of the EMIR, the Company has a liquidity plan approved by the Board that sets out the mechanisms to ensure that the CCP has access to adequate financial resources to cover its liquidity needs in any circumstances. This risk is very low given the large amount of cash margins posted. Two elements are identified in the liquidity risk:
 - Liquidity or funding risk is the risk that the Company will encounter difficulties in meeting its payment obligations or, to do so, it is forced to raise funds under onerous conditions.
 - Liquidity/market risk is the risk the Company will have one-off losses caused by the selling of assets where the strike price is significantly lower than the expected market price owing to a devaluation caused by frictions in the supply-demand balance.

Due to the specific nature of its activities, the Company has adequate controls in place for both types of liquidity risk, that are consistent, proven and in line with the best - and even the most conservative - practices in financial risk management.

In relation to liquidity/funding risk, the Company has a comprehensive liquidity plan in place, with a chain of guaranteed resources in the event more liquidity is needed than is available in the initial layers of liquidity. Further, on a daily basis, the Company carries out a simulation of the two members with the largest exposure defaulting at the same time, evaluating whether the aforementioned resources would be sufficient.

As mentioned above, the application of haircuts is one way of controlling a lack of liquidity on the market. These are also applied in stress scenarios; therefore, the collateral can easily be liquidated at its reduced value in either a normal market situation or in an extreme situation of falling prices.

There are two types of "market illiquidity". Exogenous illiquidity results from the specific characteristics of a security, from the bid-ask spread affecting settlement of the securities held by market participants. Endogenous illiquidity is specific to each market participant's individual position – the larger a participant's position, the higher the security's illiquidity for this participant.

Using the application of haircuts as a way of controlling exogenous liquidity, the Company also controls endogenous liquidity risk by controlling concentration risk, adjusting the initial margin according to a barometer of exposures measured against the volume of assets traded.

- Operational risk: Risk deriving from errors in processes and systems or human error that interrupt the service provided by the CCP or lead to economic losses. Measures in place to mitigate this risk include:
 - Double validation of key processes.
 - Daily reconciliations of the records maintained in the CCP's system and registries of the depositories, markets and settlement platforms.
 - Possibility of alternative communication and data transmission channels.
 - Business continuity policy, approved by the Board of Directors, in accordance with Article 34 of the EMIR.
 - Immediate evaluation of any operational incidents to provide a solution, prevent the incident from recurring and improve the procedures.
- Business risk: risk of a deterioration in the CCP's financial position, where expenses outweigh income (e.g. as a result of poor management) leading to the CCP having to draw down on its own resources to cover its expenses. Measures in place to mitigate this risk include:
 - The CCP maintains close contact with its members to ascertain their commercial needs.
 - Management and the CCP monitor and manage the Company's revenue and earnings.
 - The Company is a member of industry associations, such as the European Association of CCP Clearing Housing (EACH) and Futures Industry Association (FIA), and is in regulator contact with members to keep abreast of new industry needs with respect to CCPs.
 - The Company closely monitors all international and domestic legal developments.
- Risk of margins and CCP funds in deposit: risk of fraud or poor interpretation of the records. Securities are deposited directly in accounts of central depositories, whereby this risk is low, and the CCP reconciles records every day.
- Investment risk: risk that the CCP's counterparty in investments of cash collateral or the CCP's own resources goes bankrupt. This risk is low, as the Company's investment strategy is designed in accordance with Article 47 of the EMIR and is highly conservative, placing priority on security of the investment at all times over profitability:
 - Cash is invested in financial instruments with low credit and market risks. When it is invested, it is mainly in overnight Spanish sovereign debt repos, conservative haircuts are applied and risk is diversified across at least four counterparties, with high credit quality. The investments may be liquidated quickly, if required.

In the current environment, cash is not usually invested and is deposited in cash in the CCP's cash accounts in Target 2- Banco de España.

- The cash not invested, is deposited in the CCP's cash accounts in TARGET2- Banco de España, one account for own resources (NRBE 9094), the other for third-party collateral or funds not invested (NRBE 9095) and another operating account (NRBE 9088) to collect and pay securities settlements in T2S. The CCP has own funds deposited in commercial banks for operating amounts. There are no third-party funds deposited in commercial banks.

5. Capital management

To comply with EMIR regulations, specifically Article 16, and Commission Delegated Regulation 152/2013, the Company has carried out the obligatory analysis of the risks incurred, which have subsequently been classified, controlled and measured to determine that sufficient coverage is in place, according to the provisions of the regulations.

- Article 16(2) of the EMIR notes that the CCP's capital should be sufficient to ensure an orderly winding-down or restructuring of the activities over an appropriate time span and an adequate protection of the CCP against credit, counterparty, market, operational, legal and business risks which are not already covered by specific financial resources as referred to in Articles 41 to 44 of the EMIR.
- Article 45(4) of the EMIR indicates that the CCP shall use dedicated own resources before using the default fund contributions of non-defaulting clearing members. Article 35.2 of Commission Delegated Regulation (EU) 153/2013, implementing the aforementioned Article 45, indicates that the minimum specific financial resources, known as *skin in the game*, are at least 25% of the minimum capital requirement set out in Article 16 of Regulation (EU) No. 648/2012 and Commission Delegated Regulation (EU) 152/2013 of the European Commission.

At the end of 2018, the Company comfortably met the legal minimum capital requirements.

To ensure that these capital requirements are met on a timely basis, the Company has a CCP capital requirements monitoring procedure. The aim of this procedure is to ensure that sufficient capital is permanently available to cover the risks.

The financial resources are invested in accordance with Article 47 of the EMIR, i.e. they are deposited in cash in the CCP's dedicated account in TARGET2-Banco de España, or invested in financial instruments with low credit and market risks.

6. Outlook for the Company

In the first two months of 2019, 5.8 million derivatives contracts were cleared, 4.0% up on the same period in the previous year. The volume of energy contracts cleared amounted to 3.8 TWh, 108.5% more than in the same period a year earlier. A cash volume of €28,878 million was recognised in fixed-income securities trades, which was 18.0% higher than in the same period in the previous year.

In the equity segment, a volume of 12.7 million trades was cleared in the first two months of 2019 (-26.6%) for a cash volume of €143,844 million (-24.8%).

7. Research and development activities

The Company, as part of the Bolsas y Mercados Españoles Group, develops its model for innovation and technological improvement based on the design and the development of in-house applications. In 2018, the Company incurred expenses for the development of the currency futures platform.

8. Transactions with treasury shares

The Company does not hold any treasury shares and did not carry out any transactions with treasury shares in 2018. All of the Company's share capital is owned by Bolsas y Mercados Españoles, Sociedad Holding de Mercados y Sistemas Financieros, S.A. (BME).

9. Use of financial instruments by the Company

The policy pursued by the Company regarding the investment of cash surpluses in 2018 consisted of investing the surpluses in reverse repurchase agreements with short-term maturities.

Finally, under the resolution adopted by the Sole Shareholder for the derivative acquisition of the shares of Bolsas y Mercados Españoles, Sociedad Holding de Mercados y Sistemas Financieros, S.A (BME), the parent company of the BME Group, of which the Company forms a part, the Board of Directors adopted a resolution concerning the conditions and limits for purchase of treasury shares, delegating the necessary powers to the executive president and the general manager of BME to enable each or either of them to make the effective purchase of BME shares.
