## 2 FORMAT AND DATA DELIVERY

### 2.1 FILE FORMAT

BME MARKET DATA provides the data for this product in files with the txt format (";" as field separator and "." as decimal separator). This format is compatible both with databases and spreadsheets. Each field in the file will be separated from the following field by ";" and each line ends with the specific character of line end. The files will normally be available at 20:00 CET every trading day of the stock exchange calendar.

### 2.2 CLIENT SUPPORT

Address	Email	Telephone
Palacio de la Bolsa, Plaza de la Lealtad 1, 28014 - Madrid	marketdata@grupobme.es	+ 34 91 709 58 10

Users have at their disposal a client support service Monday to Friday from 09:00 to 18:30 CET. BME Market Data will keep the Client updated on any modification on the files, as well as on any technical improvements.

## 2.3 DATA FORMAT

BME MARKET DATA provides the data for this product in files with the txt format (";" as field separator and "." or "," as decimal separator). This format is compatible both with databases and spreadsheets. Each field in the file will be separated from the following field by ";" and each line ends with the specific character of line end.

### 2.3.1 Numeric Format

No thousand separations are included. The character "." or "," will be used as decimal separator.

### 2.3.2 Date and Time Conventions

Unless stated otherwise, the date fields are in the format YYYYMMDD being YYYY the year, MM the month and DD the day. Time fields are stated following the format HHMMSS or HHMMSSXX being HH the hour, MM the minute, SS the second and XX second hundredth. Dates and times refer to CET (Central European Time).

### 2.3.3 TXT files Headers

The first line of ASCII files (extensions TXT or similar) contains the headers of the file; the rest of lines contain the data, unless stated otherwise in the description specific to the product.

The SY files include the information necessary to calculate the tick size in accordance with the table published by ESMA (see below table). Depending on the contents of the field **INDTICK** there are three different ways to calculate the TICK SIZE:

- If **INDTICK** = 7, applying the **Liquidity band** 6 we obtain the TICK SIZE from the price of the security using the **Price Ranges** column.
- If **INDTICK** = 6, applying the **Liquidity band** 1 we obtain the TICK SIZE from the price of the security using the **Price Ranges** column.
- If **INDTICK** = 5, we look for the **Liquidity band** that corresponds to the security with regard to the **AvDTran** and we obtain the TICK SIZE from the price of the security using the **Price Ranges** column.

### 3.4.16 How to calculate the tick size

The file A includes the information necessary to calculate the tick size in accordance with the table published by ESMA (see below table). Depending on the contents of the field INDTICK there are three different ways to calculate the TICK SIZE:

- If INDTICK = 7, applying the liquidity band 6 we obtain the TICK SIZE from the last price of the security using the price ranges column.
- If INDTICK = 6, applying the liquidity band 1 we obtain the TICK SIZE from the last price of the security using the Price ranges column.
- If INDTICK = 5, we look for the liquidity band that corresponds to the security with regard to the ATV / ADTN and we obtain the TICK SIZE from the last price of the security using the price ranges column.

TICKSIZE	Liquidity band

MP	Quotes from 1st to 5th
P	Previous, open and close status
SM	BBO
SY	Security List (Master Data)
TX	News
TF	ETF NAV (Net Asset Value)

The ETF files structure is the same tan Equities structures (see above chapter). Only it is included the TF file with the Net asset value.

In October 2015 the partially blind market is introduced, both in equities and ETFs. Only the broker will be informed (Buyer or Seller) where expressly directed by the member, if not, the broker field (Buyer or Seller) will be in blank. This operation affects files A (Trades and Status), AE (Special Operations and blocks) and H (Cancellation).
