

BME Market Data

Promotion for Retail Data

This temporary promotion enables BME Market Members to offer Level 2 Market Data (across all asset classes and indices) to all retail clients for three consecutive months at a fixed, predictable price.

The fee will match the participant's Market Data cost for March 2026. No reporting obligations apply during the promotional period. The initiative serves as a bridge to the upcoming BME Retail Scheme.

Promotion Period

The sign-up window runs from 1 June 2026 to 30 September 2026. Enrollment becomes active on the first calendar day of each month within this period, and participants receive three consecutive months of promotional access regardless of their specific enrollment month.

Pricing

The promotional fee is a flat amount equal to the participant's Market Data invoice for March 2026.

During the promotion:

- No reporting obligations apply.
- No variable fees or additional charges are assessed.

Eligibility

Participation is restricted to **BME Market Members**. Participants must adhere to the following terms:

- Data usage is permitted **exclusively** for **retail clients**.
- Distribution to **non-retail clients** or **third parties** is not allowed.
- Enrollment must be submitted via the **designated sign-up/order form**.

Included Data

The promotion includes:

- BME Market Data Level 2
- All asset classes
- BME indices

Usage is limited to **retail distribution** only.

Key Advantages for Market Members

- Predictable **flat fee** aligned with March 2026
- **No** reporting obligations during the three-month promotion
- **Simple** enrollment and administration
- Supports **retail engagement** and client-facing initiatives
- Provides a **seamless transition** toward the upcoming BME Retail Scheme

Purpose of the Program

The program aims to:

- Reduce entry barriers for retail data offerings
- Encourage broader adoption of high-quality BME data in retail channels
- Facilitate a controlled, low-risk environment to expand market data usage
- Prepare Market Members for the forthcoming BME Retail Scheme, which will introduce a more favorable long-term model
