1 OBJECTIVE

Files after market close with data associated with investment funds: master data of BME listed investment funds, prices, volumes & Net Asset Values, and ticks on trades.

2 FORMAT AND DATA DELIVERY

2.1 FILE FORMAT

BME MARKET DATA provides the data for this product in files with the txt format (“;” as field separator and “.” as decimal separator). This format is compatible both with databases and spreadsheets. Each field in the file will be separated from the following field by “;” and each line ends with the specific character of line end.

2.2 DATA FORMAT

2.2.1 Numeric Format

No thousand separations are included. The character “.” will be used as decimal separator.

2.2.2 Date and Time Conventions

Unless stated otherwise, the date fields are in the format YYYYMMDD being YYYY the year, MM the month and DD the day. Time fields are stated following the format HHMMSS or HHMMSSXX being HH the hour, MM the minute, SS the second and XX second hundredth. Dates and times refer to CET (Central European Time).

2.2.3 TXT files Headers

The first line of ASCII files (extensions TXT or similar) contains the headers of the file; the rest of lines contain the data, unless stated otherwise in the description specific to the product.

2.2.4 Data Delivery

The information is available via Internet through sFTP (ssh File Transfer Protocol).

2.2.5 Files Names

The key when storing the information is the “Instrument Code” (VALOR), this field once the FUND is active (ESTADO=1, Active) does not change. The rest of the fields can eventually change, although this is uncommon once the FUND is active.

The first field to check is the field ESTADO:

- 1 = Active (ready to trade)
- 2 = Provisionally registered (not in the system yet)

If ESTADO = 1

- SITUNEG = 17 (Ready to Trade) It can be traded. (The field SITUACION is “ ” registered necessarily)
- SITUNEG = 18 (Not available for trading) the cause being that displayed in the field MOTIVOSUSPEN (100, 101, 102, 203). Trading is not possible in that moment.
100 = Suspended by the Regulator

101 = Interrupted by Supervision

102 = Stopped by knock-out

103 = Pending knock-in

- SITUNEG = 21 Auction (The field SITUACION is in " " registration) the cause being that displayed in the field MOTIVOSUSPEN (100, 101, 102, 203). Trading is not possible in that moment.

100 = Manual auction

101 = Extension of opening auction

102 = Extension of the closing auction

103 = Volatility auction
