Dear friend:

I am pleased to introduce BME’s Corporate Presentation, which contains the company’s main figures. We have prepared this document so that you can quickly and easily find the most relevant information about the company, with data updated to December 2020.

We begin with a brief introduction to the Group and its subsidiaries and then go on to show you the main business highlights. We then run through the different business units in which our activity is structured in greater detail, followed by the products and services we offer, as well as some information on our workforce. The presentation ends with a brief look back over the 130-year history of the stock exchange.

I hope you find this document useful.

Best regards,

Javier Hernani
CEO of BME
2. Presentation about BME

Bolsas y Mercados Españoles (BME), is the operator of all stock markets and financial systems in Spain. It was incorporated in 2001, and is part of SIX Group, the third largest exchange group in Europe.

The company has offices in Barcelona, Bilbao, Madrid and Valencia. Its headquarters are located at 1 Plaza de la Lealtad, in Madrid.

BME is structured into the following business units: Equities, Fixed Income, Derivatives, Clearing, Settlement, Market Data and Value Added Services.

Our vision of management and principles

BME gears its management towards obtaining an optimal performance from all the assets at its disposal in a responsible and sustainable manner. As operator of Spain’s financial markets and systems, BME provides a channel through which savings can be used to finance companies, while endeavouring to offer maximum speed, reliability, transparency, efficiency and security to the markets and systems it manages.

Since its incorporation, BME has always been committed to being a reference for the economy and for businesses in Spain and Latin America (through Latibex). To achieve this, its actions are guided by the following principles:

1. **Efficiency** in service provision.
2. **Market integrity**, which allows several centres to undertake trading activity simultaneously and under identical conditions.
3. **An impartial trading** environment, achieved through strict compliance with laws and regulations governing the financial markets and systems.
4. **Transparency and fairness** in the market, by providing complete information on market performance so investors can operate under the same conditions.
5. **Innovation and cutting-edge technology**, by providing the means necessary to help companies grow and actively participate in the creation of new financial products and the development of systems infrastructure.
6. **Training**, as a cornerstone for the sustainable development of a financial market.
7. **Investor protection**, which is crucial for creating a bond of trust between investors and the market.
Committed to our stakeholders

**EMPLOYEES**

13.1 hours/employee. Ratio of training hours received per employee.

**SUPPLIERS**

90.42% of BME’s suppliers are local.

**USERS**

Leading Exchange in Dividend Yield 4.5% for listed companies in 2019 (according to MSCI’s Developed Markets classification).
BME, a socially responsible company

**ECONOMIC**

Economic value generated: **287,106 thousand euros** (-6.91% vs 2018)

**ENVIRONMENTAL**

Internal energy consumption (electricity and natural gas): **33,506.54 GJ** (2.08% vs 2018)

Indirect greenhouse gas emissions (associated with electricity consumption, train and airplane business trips and employee journeys to the office in private vehicles): **2,752.50 CO2 tons** (-12.08% vs 2018)

**SOCIAL**

Economic value distributed to stakeholders: **285,008 thousand euros** (-8.67 vs 2018)

13.1 hours/employee. Ratio of training hours received per employee.

Each action performed by BME contains a commitment to the markets and to society.

7. History of The Stock Exchange
History of The Stock Exchange

FOURTEENTH CENTURY

This is the century in Spanish history that saw the construction of the Lonjas or commodity exchanges, which were meeting places where markets for grain, wool and silk were set up, a very common practice in the Mediterranean culture.

Some of the buildings housing these markets have survived, such as those in Palma de Majorca, Zaragoza, Valencia and Barcelona. Historically, these Lonjas are considered to be the institutions that most closely resemble the Spanish stock exchange, both in their essence and in their operations, although the stock exchange, strictly speaking, was born in Bruges and Amsterdam.

SEVENTEENTH CENTURY

In 1688, the first book describing stock transactions is published, entitled “Confusión de Confusiones” [Confusion of Confusions], written by the Spaniard José de la Vega in Amsterdam.

According to the author, the book is about “Curious dialogues between a shrewd philosopher, a cautious merchant and an erudite investor, describing the business of dealing in stocks, its origin, etymology, its reality, its game and its intricacy.”

NINETEENTH CENTURY

Spain’s first stock exchange was established in 1809. Joseph Bonaparte I created it in Madrid, in the building of the San Felipe El Real Convent and Church in the Puerta del Sol. In spite of this, a stock exchange was not to be set up at that time.

The stock exchange in Spain begins on 10 September 1831 with the publication of the Law Founding the Madrid Stock Exchange drafted by Pedro Sáinz de Andino.

The King Fernando VII founded the Madrid Stock Exchange in 1831. Its first trading session took place on 20 October.

The first companies to be listed were banks, railways and steel companies.

**1988**

In 1988, Spain enters the European Monetary System, thus making the country even more attractive. The **Securities Market Act**, which entered into force in that same year, definitively transforms the Spanish Stock Exchange.
### History of The Stock Exchange

**TWENTIETH CENTURY**

<table>
<thead>
<tr>
<th>Year</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>1989</td>
<td>In 1989, the continuous market commences operations. It is based on that of Toronto, which is called “CATS” (Toronto Computer Assisted Trading System). It started by trading seven major stocks and ended the year with 51. The following institutions were also established in that year: the Spanish Securities Market Commission, better known by its Spanish acronym: CNMV, as the supervisory body of markets, the Sociedad de Bolsas, which is responsible for the technical management of the electronic trading system. The dealers and broker-dealers are replaced by Governing Companies that are incorporated as public limited companies.</td>
</tr>
<tr>
<td>1991</td>
<td>MEFF is created as an equity and fixed income derivatives market. The Fixed Income Electronic Trading System was implemented and the Investor’s Ombudsman of the Madrid Stock Exchange was established.</td>
</tr>
<tr>
<td>1995</td>
<td>The CATS share trading system was replaced, in 1995, by the SIBE. Spectacular growth is seen in trading volumes and capitalisation.</td>
</tr>
<tr>
<td>1998</td>
<td>Nearly 8 million Spaniards invested in the Stock Exchange in 1998. The Stock Exchange becomes a social phenomenon driven by economic growth, the process of privatisations, initial public offerings and the modernisation of the market.</td>
</tr>
<tr>
<td>1999</td>
<td>The Latin American Securities Market in Euros (LATIBEX) was born in 1999.</td>
</tr>
</tbody>
</table>
In July 2003, the Transparency law was approved. Aimed at strengthening the transparency of listed companies, it sets out new reporting requirements and the obligation of adopting a set of mechanisms relating to corporate governance.

The same year of 2001 saw the creation of “Bolsas y Mercados Españoles”, a company that combines in a single group secondary markets and systems of registration, clearing and settlement of securities. Its size enables it to play a key role in the configuration of the European stock exchange map.

On its 175th anniversary, the Spanish stock exchange closed 2006 with the best and most outstanding year of its history. The IBEX 35® beats its historic high and breaks the barrier of 14,000 points. It also set a record in corporate operations of expansion, mergers and acquisitions, takeovers, and with 10 IPOs of new companies. The MAB market is created by BME to provide a response for securities that require special treatment as small caps, SICAVs, venture capital firms and hedge funds.

In 2004, and in spite of uncertainty about the world economic recovery, the upward swing in oil prices and the weakness of the dollar against the euro, the stock exchanges regained the levels seen prior to the attacks of 11 September 2001. By the end of the year, the Spanish stock exchange trebles the rise of European stock exchanges. The IBEX 35 went above 9,000 points. The Spanish stock exchange becomes a European leader in terms of financing. The new investment flows channeled by the Spanish stock exchange amounted to 39.5 billion dollars, becoming the second ranked in the world, behind only the New York Stock Exchange.

In July, the first Exchange-Traded Funds (ETFs) begin to be listed in the Spanish stock exchange with the addition of the first products on the IBEX 35, followed a few months later by ETFs on the EuroStoxx 50.

In the same month of 2006, BME attained one of the most important objectives set out in its incorporation as an integrated group of all Spanish markets: its IPO on the stock exchange.
7. History

History of The Stock Exchange

TWENTY-FIRST CENTURY

2007
In 2007, the MiFID, or the Markets in Financial Instruments Directive, entered into force. For the Spanish securities market, the transposition of the EU Directive to Spanish law took the form of the Securities Market Reform Law, which contains significant changes in the organisation and execution of tasks associated to each of the actors involved in the value chain of the stock exchanges and financial markets in general. The main objectives of the new law were as follows: modernisation of the securities market, strengthening of investor protection and the improvement of supervisory powers.

2008
2008 is the year of the crisis. The stock exchanges began to be affected ever more intensely by the effects of the financial crisis on world economic activity and on listed companies, in particular. Falling share prices were supplemented by a massive increase in the volatility of world stock exchanges to the highest levels in twenty years.

2009
In 2009, BME commenced securities trading with more than two decimals with the shares of Jazztel, which becomes the first company listed in the Spanish stock exchange that is traded under this modality. The reasons are based on the large number of buy and sell orders in listed Spanish securities, which include the most highly liquid shares in Europe, and with the intention of strengthening the Spanish stock market.

BME carries out the operating initiatives in order to boost the solvency and efficiency of its trading platforms. In this regard, one of the most significant actions in 2009 was the transfer of equities that were being traded in open outcry pits on the trading floor to a new electronic trading floor, with the aim of strengthening their liquidity, increasing their transparency and improving their accessibility.

In April of the same year, BME expanded the series of the IBEX 35® indices and created new tradable indices, all based on the IBEX 35®. The indices, called IBEX 35® net return, IBEX 35® double short, IBEX 35® triple short, IBEX 35® double leverage and IBEX 35® triple leverage, began to be calculated and disseminated in real time.

### History of The Stock Exchange

#### 2011

In 2011, the stock exchange turned 180. On 20 October 1831, the first session of the stock exchange in Spain was held, making it one of the oldest and most consolidated economic institutions in the country. Its birth was the prelude, some decades later, of a majority of today’s economic and financial institutions. Over this long historical period, a market has developed that today trades, on average, more than 4 billion euros per session, and which lists more than 3,000 securities, with a capitalisation of nearly 1 trillion euros. The Spanish stock exchange had its fourth best year in 2011 in terms of investment flows channeled by the market.

The harshness of the crisis moved from the financial sector to sovereign debt in 2010, and it concentrated mainly on countries with a more critical fiscal position, which destabilised the value of the euro. After Greece and Ireland, the question of confidence in Spain and the risk premium took centre stage. The stock exchange fulfilled its role in valuating and channelling funds for business projects. During that year, initial public offerings in the stock exchange amounted to 13.7 billion euros and listed companies increased their capital by 12.5 billion, which was 27% more than in 2009.

**REGIS-TR**, the European Trade Repository owned by BME and Clearstream (Deutsche Börse Group) starts operations. It is the answer to demands from the regulators for more transparency in the OTC derivatives market.

#### 2013

BME became, in 2013, the fourth-ranked stock exchange in the world in terms of investment flows. The trading quality of Spanish securities once again received international recognition, as Santander, Telefónica and BBVA were the most highly liquid securities on the EuroStoxx 50 in 2013.

The Mercado Alternativo de Renta Fija (MARF) starts operations. It is an initiative aimed at channelling financial resources to a large number of solvent companies that can obtain financing using this market on the issuance of fixed-income securities.

#### 2014

The year 2014 marked a historic high in the number of trades, with the largest number of initial offerings in the last four years. The indicators confirmed the exit from the recession, while the stock exchange achieved records in a number of areas of activity. The Spanish stock market ended 2014 among the world’s largest, with a capitalisation of 1.1 trillion euros.
History of The Stock Exchange

TWENTY-FIRST CENTURY
